## THE GENERAL LAND OFFICE

The Colonial Congress, September 16, 1776, passed a resolution making grants of lands to certain officers and soldiers, such lands to be provided by the United States and the expense of procuring them to be borne by the States as other expenses of war.

May 20, 1785, and thereafter, the Board of Treasury under the Confederation made sales of public lands and gave certificates of purchase. The first patents for lands by the Government were issued by this board; the first was dated March 4, 1788, and the last March 3, 1789.

The act of August 7, 1789 (1 Stat. 49), gave the Secretary of War supervision over the granting of lands to persons entitled thereto for military services rendered the United States, and by the act of September 2, 1789 (1 Stat. 65), the Secretary of the Treasury was charged with the execution of such duties relative to the sale of the lands belonging to the United States as might by law be required.

The act of May 18, 1796 (1 Stat. 464), for the sale of lands in the Northwest Territory, now in the State of Ohio, provided for a surveyor general, defined his duties, and directed that plats of survey be sent to the Secretary of the Treasury, who thereafter gave notice of sales and performed other executive duties. He became the executive power or agent in the sale or disposition of the public domain, issuing patents for grants of lands, etc., with the aid of registers and receivers of the district land offices after 1810, and remained so until the organization of the General Land Office in his department.

April 25, 1812 (2 Stat. 716), Congress created the office of the Commissioner of the General Land Office and made his bureau subordinate to the Treasury Department, giving him authority to issue patents and perform duties formerly executed by the several departments. The Secretary of the Treasury, by acts of Congress, thereafter was given general supervision of the Commissioner of the General Land Office, and appeals from the action of the commissioner were made to him.

By act of July 4, 1836 (5 Stat. 107), the General Land Office was reorganized, and the executive duties appertaining to the survey and sale of the public lands and the issuance of patents were devolved on the commissioner; and a principal clerk of the public lands, a principal clerk of private land claims, a principal clerk of the surveys, a recorder of the General Land Office, and a solicitor of the General Land Office, and a secretary to sign the President's name to all land patents were authorized.

By act of March 3, 1849 (9 Stat. 395), Congress created the Home (now Interior) Department, and by section 3 of that law provided that the Secretary of the Interior "shall perform all the duties in relation to the General Land Office of supervision and appeal now discharged by the Secretary of the Treasury."

The General Land Office has since remained a bureau under the supervision of the Secretary of the Interior.

# REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE FOR THE YEAR ENDED JUNE 30, 1932

---

DEPARTMENT OF THE INTERIOR,  
GENERAL LAND OFFICE,  
Washington, August 31, 1932.

DEAR SIR: Statements showing in detail the activities of the General Land Office and its field forces for the year ended June 30, 1932, follow. Unless otherwise indicated in the text the recitals relate to such fiscal year.

## PREFATORY

Original public-land entries for the fiscal year ending June 30, 1932, embraced 4,551,774 acres, while those for the decade closing the same date covered 45,002,883 acres. The new entries last year were, therefore, more than 50,000 acres in excess of the annual average for the past 10 years.

The homestead laws retained their usual leadership. They accounted for almost 90 per cent of the areas in new segregations and more than 75 per cent of those patented.

No spectacular finds of valuable ores were made, but the search for minerals continued along normal lines. Patents for 301 mineral entries were issued, as against 222 the year before. Satisfactory progress was made in the disposition of oil-shale cases.

The additional sum of \$35,000 made available for protecting public lands and timber enabled the office to materially reduce the field arrearages. New cases received were substantially the same as in 1931, but those reported, considered, and closed were 26,695, as against 19,998. The number not reached for investigation was 11,006, as compared with 17,246 on hand at the beginning of the year.

The splendid cooperation I have received from the entire force both here and in the field, together with the small increase in appropriation, enabled me to largely eliminate the arrearages reported last year.

## RECEIPTS AND EXPENDITURES

*Cash receipts.*—The total cash receipts from sales, leases, and other disposition of public lands (including receipts from copies of records, sales of Government property, etc.) were \$4,065,210.76 and from proceeds of Indian lands \$63,874.01, an aggregate of \$4,129,084.77, all of which was deposited in the Treasury.

*Receipts under mineral leasing act.*—Receipts of the Federal Government from bonuses, rentals, and royalties under the act of February 25, 1920, providing for the leasing of mineral rights on the public

domain, aggregated \$3,236,978.35. The largest receipts were from mineral lands in Wyoming, the amount under this act being \$1,435,109.81. California was a close second, with receipts totaling \$1,402,264.05. Receipts from other States were: New Mexico, \$118,108.42; Utah, \$84,545.04; Colorado, \$70,023.06; Montana, \$69,098.81; North Dakota, \$23,871.41; Washington, \$11,924.45; Alabama, \$8,982.20; Louisiana, \$5,577.62; Idaho, \$4,833.97; Nevada, \$2,255.77; South Dakota, \$362.16; and Oregon, \$21. These figures do not include \$20,732.85 received as royalties in the State of Wyoming under the act of June 26, 1926, of which the State does not receive a share, nor \$4,523.25 received as royalties on coal leases in Alaska, of which the Territory receives no share. Under the provisions of the mineral leasing act of February 25, 1920 (41 Stat. 437), the State receives 37½ per cent of the receipts from bonuses, rentals, and royalties thereunder from the public lands within its borders, the reclamation fund receives 52½ per cent, and the other 10 per cent remains in the Treasury of the United States to the credit of miscellaneous receipts.

*Distribution of receipts.*—They are distributed under the law approximately as follows: Reclamation fund, \$2,100,555.87; to the public-land States and certain counties within such States, \$1,402,420.93; general fund, \$562,233.96; and to the various Indian tribes, \$63,874.01. Five per cent of the net proceeds from cash sales of public land are paid to the public-land States within which such sales were made, and the balance of such net receipts from States named in the reclamation act are credited to the reclamation fund; 90 per cent of the receipts under the mineral leasing act are divided between the States from which the minerals (principally oil) were taken and the reclamation fund; the receipts from sales of reclamation town sites and camp sites and rentals and royalties from potash leases are credited to the reclamation fund; all of the receipts from sales of land and timber in the forfeited Oregon and California railroad grant, and more, will be paid to certain counties in Oregon in lieu of taxes that would be collected by the counties if the lands were in private ownership; 25 per cent of the proceeds from land and timber in the Coos Bay wagon-road grant are paid to the counties from which the proceeds were derived; the receipts from Indian lands, with the exception of 37½ per cent of royalties from the Red River oil lands in Oklahoma, which are paid to the State, are deposited in the Treasury to the credit of the various Indian tribes. All other moneys are deposited in the Treasury to the credit of the general fund.

The following table shows the distribution of these moneys in so far as is possible before final settlement of all accounts by the General Accounting Office:

Source of receipt	Disposition in the Treasury			
	General fund	Reclamation fund	State fund	Total
Sales of public lands.....	\$45,962.43	\$114,575.00	\$6,260.00	\$166,797.43
Fees and commissions.....	68,938.87	268,561.00		337,499.87
Bonuses, rentals, and royalties from mineral leases.....	345,161.75	1,698,987.18	1,213,562.27	<sup>1</sup> 3,257,711.20
Proceeds of land and timber in Oregon and California railroad grant.....			164,920.91	<sup>2</sup> 164,920.91
Proceeds of land and timber in Coos Bay wagon-road grant.....	53,903.55		<sup>3</sup> 17,677.75	71,581.30
Power permits.....	14,981.45			14,981.45
Fees from copies of records.....	12,810.45			12,810.45
Royalties and rentals from potash deposits.....		12,138.99		12,138.99
Sale of reclamation town sites.....		6,293.70		6,293.70
Miscellaneous (rent of land, royalties on coal leases and fur farms in Alaska, sale of timber in Alaska, surveying fees, etc.).....	20,475.46			20,475.46
Total.....	562,233.96	2,100,555.87	1,402,420.93	4,065,210.76
Sales and leases of Indian lands.....				<sup>4</sup> 63,874.01
Aggregate.....				4,129,084.77

<sup>1</sup> First and fourth column contain \$20,732.85 royalties received in Wyoming under act of June 26, 1926.  
<sup>2</sup> It is estimated that this amount will be paid to certain counties in Oregon in lieu of taxes.  
<sup>3</sup> Amount payable to Coos County, 25 per cent of proceeds of land and timber.  
<sup>4</sup> Of the amount received as royalties from oil lands in the bed of Red River, Okla., 37½ per cent, \$6,023.69 is paid to Oklahoma, and the balance, amounting to \$10,039.45, is credited to the Kiowa, Comanche, and Apache Indians.

*Expenditures.*—Total expenditures for the conduct of the business of the General Land Office, including expenses of the district land offices (\$270,395.13), amounted to \$2,204,224.16. Disbursements from deposits by individuals for surveying public lands (\$19,503.95) and from appropriations and funds for surveying Indian reservations (\$47,432.60) are not included in the above figures, either as receipts or expenditures.

AREA OF LAND ENTERED AND PATENTED

The total area of public and Indian lands originally entered and allowed was 4,551,774 acres, not including 53,102 acres embraced in finals not heretofore counted as original disposition of land. The latter area is constituted as follows: Public auction, 22,224 acres; abandoned military reservations, 268 acres; cash and private sales, individual claimants and small holding claims, 14,366 acres; pre-emption entries, 320 acres; soldiers' additional homesteads, 1,169 acres; timber and stone entries, 3,919 acres; mineral entries, 10,836 acres. Allowed original homestead entries embraced an area of 4,049,854 acres, of which 3,543,582 acres were under the stock-raising act of December 29, 1916 (39 Stat. 862).

The area patented on original disposition was 1,897,978 acres, of which 1,120,332 acres were patented with all minerals reserved; 1,438,075 acres were patented under the homestead laws, not including as homesteads 1,844 acres patented as soldiers' additional entries. In addition, 144,622 acres were patented as follows: Indian fee, 49,613 acres; timber sales in Oregon, 2,865 acres; and reissues, 92,144 acres.

### FIELD SERVICE

The appropriation for this service was \$485,000. Of this sum, \$60,000 was set apart for prevention and suppression of forest and other fires on the public lands, leaving the net sum of \$425,000 for the prosecution of routine work.

*Personnel.*—The average number of active field investigators, exclusive of 7 division chiefs, was 75; average number of clerks employed in divisional offices, 22; total force employed, including division chiefs, 104.

*Collections and restorations.*—Due to the activities of field investigators, \$88,954.35 was collected and turned into the Treasury, and 107,270.92 acres were restored to the public domain, representing fraudulent entries, etc., canceled on proceedings based on their reports.

*Investigations.*—July 1, 1931, there were pending field investigation 17,246 cases. During the year, 20,455 additional cases were received; 26,695 were investigated, reported, and closed, leaving 11,006 pending investigation, which is a material reduction in the number of routine cases. Of the 26,695 reports submitted, 7,673 were adverse and 19,022 favorable.

*Action in courts.*—On the recommendation of this department, 44 civil suits were brought by the Department of Justice. Thirty-two cases were tried, of which 29 were won and 3 lost. As a result of the suits, \$3,652.06 were recovered and 5,120 acres restored to the public domain. Offenses against the public land laws were responsible for seven indictments. Of the criminal cases tried, three resulted in conviction, and prison sentence was assessed in one case. Fines were imposed to the amount of \$750.

*Attorneys and agents.*—The number admitted to practice before the department for the year ending June 30, 1932, was 24.

*Forest fires.*—The appropriation for protecting public lands, timber, etc., 1932, included \$60,000 for prevention and suppression of forest and other fires on public lands, to be available for this and no other purpose. Due to exceptionally heavy fires during last summer and fall, fire-suppression costs were in excess of the amounts devoted exclusively to that use. The total amount spent for fire prevention and suppression was approximately \$66,000, exceeding the actual fire allotment in the appropriation by approximately \$6,000.

### CADASTRAL ENGINEERING SERVICE

*Organization.*—The cadastral engineering field operations under the administrative control of the commissioner are conducted by the supervisor of surveys, with headquarters at Denver, Colo. A field office under the associate supervisor of surveys was maintained in Washington. The 12 public survey offices located at Helena, Mont.; Cheyenne, Wyo.; Denver, Colo.; Santa Fe, N. Mex.; Phoenix, Ariz.; San Francisco, Calif.; Reno, Nev.; Salt Lake City, Utah; Boise, Idaho; Olympia, Wash.; Portland, Oreg.; and Juneau, Alaska, were continued, but the office at San Francisco was transferred to Glendale, Calif., on June 30, 1932.

The district cadastral engineer at Portland, in addition to his engineering, continued the classification and sale of lands on the Oregon and California land grant and the Coos Bay Wagon Road grant, Oregon.

The associate supervisor of surveys was granted a four months' leave without pay to enable him to act as commissioner of the Supreme Court of the United States in the resurvey of the Colorado-New Mexico State boundary line.

*Appropriations.*—In addition to the direct appropriation carried in the Department of the Interior act approved February 14, 1931, amounting to \$700,000, moneys derived from the following appropriations and funds were received and used during the year:

Surveying and allotting Indian reservations	\$37, 090. 00
Quieting title, Pueblo lands, New Mexico	8, 000. 00
Deposits by individuals:	
R. S. 2334, mineral	} 13, 071. 00
R. S. 2401	
Act of Feb. 27, 1899, S. P. R. R.	
Special deposits, resurveys, act of Sept. 21, 1918	
Special deposits:	
Alaska nonmineral surveys, act of Apr. 13, 1926	1, 356. 87
Alaska forest homestead entries	154. 32
Ammunition-storage facilities, Navy	2, 296. 21
Barracks and quarters, Army	1, 303. 12
Total	63, 271. 52

*Income (public moneys).*—Funds collected by this service and deposited in the Treasury during the fiscal year 1932 consisted of the following:

Deposits by individuals, R. S. 2334	\$8, 643. 00
Deposits by individuals, act of June 10, 1910	300. 00
Miscellaneous receipts; copies of records	2, 680. 63
Proceeds, sales of Government property	117. 00
Total	11, 740. 63

*Extent of operations.*—Cadastral surveying operations were carried on in 23 States and the Territory of Alaska under 224 groups, of which 85 in 20 States were of resurveys. That part of the work measurable on a quantity basis aggregates 17,803 linear miles, which were surveyed at an average cost of \$18.32 a mile.

*Classifications explained.*—In considering the following analysis by survey classifications it will be understood that present-day cadastral work, aside from regular subdivisions, is so involved that one field operation may include surveys in several classes between which it is impossible to draw a definite line of demarcation. Practically all extension and miscellaneous surveys, for example, require in their execution the making of retracements and resurveys of obliterated or faulty work of an older period upon which new surveys are to be initiated or closed. Even a group as distinctive as cooperative surveys may include areas coming within the meaning of several other classifications. Moreover, a survey applied for by a Federal agency may also be based upon an application by settlers or the State, or be prompted by other administrative necessities, such as the adjustment of power-site withdrawals, or by the requirements of mineral and agricultural tract segregations, and yet be executed as one field unit under one set of special instructions. However, effort is made in this analysis to segregate the several types of lands involved in each survey operation into their proper classes.

*Agricultural lands.*—Surveys applied for by settlers and the States to accommodate entries under the enlarged and stock-raising home-

stead acts and to provide for State selections continue to represent in point of volume the major surveying activity of the General Land Office. In view of the importance of such work to development progress, a special effort is made to keep it current. In late years, however, on account of appropriation limitations and increased survey authorizations, this has been impossible of accomplishment. Nevertheless, during the year just closed approximately 2,027,000 acres of agricultural lands were surveyed under the rectangular system in the United States proper and Alaska, the larger fields of activity being in the States of Arizona, Nevada, New Mexico, and Utah.

*Nonagricultural and mineral lands.*—Continuation of the survey of township exteriors over parts of southeastern Utah to serve as bases for description of oil placer claims and for other location purposes, the survey of over 22,100 acres of oil-shale lands in western Colorado, the survey of the 4,150-foot contour line through the townships invaded by Upper Klamath Lake as a basis for the restoration of reclamation withdrawals, the completion of certain surveys for the Northern Pacific Railroad Co. in Oregon, the establishment of a segment of the true California-Nevada diagonal boundary with new closings of the public-land lines thereon in six townships, and the closing of subdivisional lines in one township on the Colorado-New Mexico boundary and in five townships on the Texas-New Mexico boundary as these lines are now established by the United States Supreme Court, constitute the outstanding projects completed in this class. In addition, surveys of smaller, scattered nonagricultural and mineral lands were made in a number of the active public-land States west of the one hundred and ninth meridian. The small part of the work of this class measurable on an area basis approximates 40,000 acres.

*Indian surveys.*—Under the appropriation for surveying and allotting Indian reservations, surveys were continued during the year on the Leech Lake, Minn.; the Cheyenne River, S. Dak.; and the Mescalero-Apache Reservations, N. Mex.

The extensive surveys initiated in 1918 along the Yakima River on the Yakima Reservation, Wash., were completed, as were those on the San Carlos and Fort Apache Reservations, Ariz., and on the so-called "Navajo Lands" to the southeast of the Navajo in New Mexico. Also, the reconnaissance survey south and west of the present southwest boundary of the Yakima Reservation, Wash., initiated late in the fiscal year, to secure data relative to a divide alleged by the Indians to constitute the true boundary of their lands under treaty stipulation, was completed in the field.

In addition surveys were initiated on the Casa Blanca Canal project and in the lowlands of the Gila River Indian Reservation, Ariz. Substantial progress was also made on the Navajo project, New Mexico, and on two townships within the Navajo boundaries in Arizona, to provide a basis for selections by the Santa Fe Railroad. Also, surveys of the Pueblo Indian land grants of Isleta, San Juan, San Ildefonso, Picuris, and San Felipe were executed and the returns thereof prepared in part for the Pueblo Lands Board under section 13 of the act of Congress approved June 7, 1924 (43 Stat. 636), to quiet title within Indian pueblos in New Mexico.

*Cooperative surveys.*—Governmental agencies whose activities are based on or are directly related to the public lands are dependent upon cadastral surveys of the General Land Office for geographical position

and description in meeting specific procedures under the law and for administration.

*Department of Agriculture.*—Surveys were executed for a greater number of these agencies than usual, chief among them being the Forest Service. On national forests in all active public-land States and Alaska, and in Alabama, Arkansas, Florida, Michigan, and Minnesota, such work aggregated, exclusive of boundary lines and special cases not measurable on a quantity basis, approximately 800,000 acres.

*War Department.*—Pursuant to request of the War Department a survey of the Fort Canby Military Reservation, Wash., and a field investigation and survey of the Fort Huachuca Military Reservation, Ariz., were made.

*Navy Department.*—For the Navy Department the Hawthorne ammunition depot at Hawthorne, Nev., was surveyed, and a special cadastral map thereof was compiled as a reference for development and administration.

*Treasury Department.*—A tract of land invading three townships and adjoining the international boundary between the United States and Mexico, as reserved by Executive Order 5462, dated October 10, 1930, was surveyed for the Customs Service.

*Commerce Department.*—Air navigation site No. 69 in Wyoming was marked upon the ground for the Department of Commerce. Also, a limited resurvey with meanders of Utah Lake, Utah, was made for the Bureau of Fisheries.

*Federal Power Commission.*—A resurvey of sections adjacent to the Mokelumni River in California was executed for the Federal Power Commission.

*Coast and Geodetic Survey.*—Cooperation with the United States Coast and Geodetic Survey in tying in positions in the rectangular net to the first-order triangulation arc in Montana, Wyoming, Utah, Colorado, and New Mexico, begun in 1931, was resumed, but on a limited scale, owing to heavy demands on the appropriation elsewhere. The results of such work are of value in the compilation of General Land Office maps.

*National Park Service.*—A number of important projects were undertaken for the National Park Service, including continuance of the survey of the revised boundaries of Yellowstone National Park, initiated in 1931, and completion of the revised west boundary of the Sequoia National Park, Calif.

*Geological Survey.*—For the Geological Survey extensive surveys of coal-land leases were made in Utah, Colorado, and Wyoming. This work required not only determination of the lawful lines of survey marking the boundaries between public and privately owned lands and leased lands on the surface, but their projection to the underground workings of the mines themselves.

*Bureau of Reclamation.*—Surveys for the Bureau of Reclamation, primarily for administration and engineering bases, include those on the Boulder Canyon Reservation project in Nevada, meanders of the Belle Fourche River in South Dakota, and certain adjustments on the Owyhee project, Oregon.

*Fatio grant, Florida.*—In addition to the customary assistance rendered the Field Service of the General Land Office in identifying area in the public-land States, an investigation was made for that service

of the Fatio grant in Florida. Such work as is measurable on an area basis aggregates approximately 900,000 acres.

*Miscellaneous surveys.*—Accomplishments in this group as a rule are not measurable on a mileage or acreage basis. The several projects are, therefore, listed herein by name, those of similar character being arranged in groups when possible. Such undertakings include field investigations in 18 States, largely of erroneous and fictitious surveys, but also of alleged islands, omitted lands, and a variety of incongruous old survey conditions. Many of them were of limited extent, while others developed into complicated cases of far-reaching importance, involving several townships and not infrequently requiring in their settlement action by the United States courts. In this general class may be included surveys made in Arkansas, Florida, Missouri, and Wisconsin to determine riparian conditions resulting from accretions and avulsions and to define swamp, overflow, and omitted lands.

*Irregular tracts.*—Surveys related to but not essentially a part of the rectangular system include 45 islands in Montana, Nebraska, Washington, Illinois, Michigan, Minnesota, and Wisconsin, 18 mineral-land segregations in Arizona, Colorado, Idaho, Montana, New Mexico, South Dakota, and Utah; and 19 isolated tracts in Arizona, Colorado, New Mexico, and Michigan. Many miscellaneous surveys do not lend themselves to orderly grouping. In Alaska cadastral surveys were executed of 34 isolated homesteads, 6 soldiers' additional homesteads, 3 trustees' town sites, the boundaries and subdivisions of Port Arthur town site, the east boundary of the addition to Wrangell town site, 1 Indian allotment, 1 mission site, 21 school reserves, and the United States Customs Reserve at Unalaska.

*Closings on private grants.*—Additional surveys were executed on the south boundary of Rancho Los Laureles, California, with subdivisional closings thereon, and similar surveys in New Mexico, as a basis for new or amended closings, were made on the boundaries of the Santo Domingo Pueblo, and on the Antonio Martinez, Canada de Los Alamos, Lamy, Las Vegas, and Antonio Ortiz grants.

*Special acts.*—Also in New Mexico 3 tracts were surveyed under the act of June 8, 1926; 6 tracts under the act of December 22, 1928; and 8 tracts under the act of April 4, 1931. In addition a special survey was executed in Michigan under the so-called "color of title" act of February 16, 1928.

*Oregon and California revested lands.*—Survey work was continued on the Oregon and California land grant, Oregon, for purposes of classification and sale, and in connection with timber trespass cases. No attempt is made to list surveys of this class on a measurable basis.

Original work in all the foregoing classifications measurable on an area basis totals 2,967,000 acres.

*Resurveys* in the foregoing classifications were made during the year in 20 States, largely in agricultural areas because of obliteration, and in mountainous districts because of distortion in the older surveys executed under contract. Owing to limited funds, only the most urgent cases in this class could be given attention. That part of the work measurable on a quantity basis aggregated during the year 1,165,800 acres.

*Field office work.*—Surveys and resurveys in 281 townships were platted and approved; 389 supplemental and segregation plats were

constructed, exclusive of 15 supplemental plats accompanying survey returns; and the work of examining, platting, and approving 137 mineral surveys, embracing 803 locations, at an average office cost of \$20.52 per location, was accomplished. Also, the returns of 14 forest homestead entry and exchange surveys were examined and approved, at an average cost of \$6.97.

In addition, the usual amount of related office work was performed, including a voluminous correspondence; the preparation of special instructions for surveys and resurveys, with diagrams; the writing and checking of field notes; the making of special reports; the platting of 966 Pueblo claims in New Mexico; the platting of 42 isolated tracts in Alaska; and of a number of town sites, Indian allotments, islands, and fragmentary surveys throughout the country, as well as the copying of survey records for the public and for official use. Also, the necessary work incident to personal calls by the land-using public, such as homesteaders, land owners, mineral applicants, and their lawyers and engineers, continued without interruption during the year in all offices of the service, being especially heavy in the mineralized districts of the West.

*Accepted surveys.*—There were accepted and placed on file plats representing 1,598,220 acres of original surveys of public lands, and in addition 768,093 acres of lands resurveyed, comprising an aggregate area of 2,366,313 acres.

### CARTOGRAPHIC ENGINEERING SERVICE

*Map of the United States.*—The 1931 edition of the map of the United States has been printed and is now being distributed.

*State maps.*—New maps of Wisconsin and Wyoming have also been issued. The State maps of Idaho and Oregon are in the hands of the contractor for printing. Work is progressing upon the recompilation of the maps of the States of Arizona and Colorado, and preliminary work has been undertaken on the compilation of a new map of the Territory of Alaska.

*Special maps.*—Three special maps of the Owens River Valley and Mono Lake districts, California, showing the status of the land withdrawn for the protection of the watershed supplying water to the city of Los Angeles and other cities and towns in the State of California, and for leasing for grazing purposes under the act of March 4, 1931 (46 Stat. 1530), were completed. Another special map was prepared showing the status of lands included in the Mizpah-Pumpkin Creek grazing district, Montana, for grazing and range-development purposes as authorized by the act of March 29, 1928 (45 Stat. 380). Photolithographic editions of each of these three maps were printed for public use. Work continued in the preparation of numerous maps for the use of the Department of Justice in connection with suits brought by the Sioux and other Indians, for lands for which the Indians claim they have never been compensated, and for the suit of the Kansas or Kaw Indians *v. The United States* (Court of Claims, F-64).

Seven maps were prepared for the Department of Justice showing land grants of the Northern Pacific Railway for use in the case of the *United States v. Northern Pacific Railway Company et al.* Eleven maps and charts were made for the National Advisory Committee on

Illiteracy. In addition the drafting force was called upon to execute a particularly large volume of miscellaneous work during the fiscal year.

*Photolithographic copies.*—There were sold 7,991 photolithographic copies of township plats, for which \$4,048.50 was received and 5,697 copies were furnished other departments for official use; 261,679 circulars covering the various public land laws and the regulations thereunder were distributed, 2,303 maps mounted, and 3,414 map publications distributed.

### HOMESTEADS AND ASSOCIATED ENTRIES

*Homesteads.*—Homestead entries under the various public land laws were allowed as follows: The general provisions of section 2289 R. S., title 43, chapter 7, section 161 U. S. C., 2,942 for 303,545 acres; enlarged, act of February 19, 1909 (35 Stat. 639), title 43, chapter 7, section 218 U. S. C., 777 for 202,727 acres; stock raising, act of December 29, 1916 (39 Stat. 862), title 43, chapter 7, section 291 U. S. C., 7,291 for 3,543,582 acres, a total of 11,010 entries embracing 4,049,854 acres.

*Homesteads and other applications and entries.*—Brought over from last year were 2,359 cases. There were received 38,088 cases. Dispositions numbered 35,531 and the cases remaining 4,916. Patents approved included 5,639 homestead entries. There were also acted upon 1,837 applications to make second homestead entry, 802 applications to amend, 1,008 applications for leaves of absences and for extensions of time to establish residence, 8,033 original entries, and 14,875 appeals from actions of district land offices and this office. There were, therefore, considered a total of 26,555 cases involving applications for second homestead entries, amendments, extensions of time, leaves of absences, original homesteads, and appeals.

*Isolated tract sales.*—Public sale applications under section 2455, Revised Statutes, as amended, receiving action were 1,089, and of these, 286 sales were approved for patenting.

*Timber and stone.*—Consideration was given 324 applications under the timber and stone laws. Ninety were passed to patent.

*Letters.*—Answers were given to 65,667 letters relating to homestead matters.

*Work not reflected by figures.*—Considerable work which can not be reflected by figures is performed in connection with cases involving lands within those States having no local land offices.

Under the practice of filing plats of survey and resurvey for lands in States having district land offices, this office issues instructions to the district land officers concerning the filing of the plats, the opening of the land to entry and disposal, the effect had thereon by withdrawals and reservations, if there be such, and the preference right of former service men and others. When necessary the Executive orders revoking previous ones are prepared and promulgated. Instructions were issued involving 270 plats filed. Where the lands affected are in States having no district land offices, this office performs the work usually done by the district land officers. Twenty plats were directly filed in this office, and in connection therewith 19 public notices were prepared.

*National forests.*—Restorations to the national forests within which they are situated were made of 17,062 acres theretofore subject to homestead entry under the act of June 11, 1906. The Department of Agriculture initiated the movement for rendering 1,645 acres of lands within forests subject to homestead entry.

### **RESTORATIONS AND OPENINGS SUBJECT TO THE PREFERENCE RIGHT OF EX-SERVICE MEN**

Pursuant to the provisions of joint resolution approved June 12, 1930 (46 Stat. 580), extending preferences to ex-service men, public lands were restored from withdrawals to the extent of 3,578,768 acres, and 809,664 acres became subject to entry through the approval of surveys.

### **MINERALS AND MINING CLAIMS**

*Oil and gas leases.*—Relief and lease applications under sections 14, 18, 18-a, 19, and 22, act of February 25, 1920 (41 Stat. 437), on hand at beginning of the year numbered 26. There were 1,209 cases received, and 53 leases involving 37 cases were granted. Section 14 of the general leasing act rewards the discoverer of oil or gas proceeding under a prospecting permit with a preference right to a lease. In 44 leases issued under the foregoing authority, there were embraced 24,264.74 acres. Public sale provisions of the leasing act resulted in the following leases: In the Virgin oil field, Utah, 1 for 200 acres for which a bonus of \$120 was paid; 1 in the Kirby Creek oil field, Wyoming, for 37.89 acres for which \$151.56 was paid; 1 in the Artesia field, New Mexico, for 200 acres for which the Government received \$685; 2 in the Kevin-Sunburst field, Montana, 1 for 320 acres, the other for 194.68 acres, for which \$50 was paid in each case; 4 in the Buffalo Basin field, Montana, 2 for 640 acres each for which bonuses of \$14,560 and \$16,960 were paid, 1 for 578.64 acres for which \$2,893.20 was paid, and the other for 634.79 acres for which there was received \$32,532.99. Sales of other areas were authorized, but leases have not been completed. Canceled in their entirety were 11 leases affecting 9 cases, while 16 leases covering 14 cases were canceled in part. Other actions to the extent of 1,150 were taken, leaving 21 cases awaiting consideration.

*Cooperation and unit plan of development.*—Pursuant to the act of March 4, 1931 (46 Stat. 1523), the Secretary, on February 11, 1932, approved operating agreements submitted by the Mountain Fuel Supply Co. covering plan of development of gas to be supplied through an elaborate pipe-line system to towns in Colorado, Wyoming, and Utah, including Ogden and Salt Lake City, Utah. The plan as at present outlined covers 46 permits and leases and anticipates an ultimate expenditure of approximately \$33,000,000. The Secretary under the same act, with the cooperation of lessees and permittees, approved the unit plan of operation on three geologic structures in Wyoming, namely, Little Buffalo Basin field, eight leases and one permit, together with fee and State land, embracing 4,806.4 acres; Big Sam Draw gas field, three leases and one permit for 1,960 acres; and Billy Creek gas field, two leases, which, together with fee and State lands, covered 710 acres.

*Oil and gas permits.*—Based upon applications filed prior to the order of March 13, 1929, 43 permits were granted. Eleven applications for permits and 38 permits which had been canceled were reinstated. Final action was taken on 55 applications, 178 assignments were considered, and 249 applications for extensions of time were disposed of.

*Order of March 13, 1929, modified.*—The order of March 13, 1929, was, on April 4, 1932, modified by the Secretary of the Interior, and under appropriate regulations the public domain was again opened to the filing of applications for prospecting permits under section 13 of the leasing act and subsequent legislation providing for unit development. There were 1,710 applications for permits filed under the modified regulation. Permits totaling 1,060 were canceled and 1,049 held for cancellation. Among the canceled permits were 273 in Alaska. Action was taken on 7,110 permits, leaving 2,239, including the 1,710 applications filed under the regulations of April 4, 1932, not reached.

*Mineral entries.*—Brought over from last year were 155 mineral entries; 694 were received and 786 adjudicated, leaving 63 on hand. There were approved for patenting 282 entries.

*Mineral applications.*—July 1, 1931, there were pending 32 mineral applications; 132 were received and 157 disposed of, leaving only 7.

*Miscellaneous mineral cases.*—There were in the office at the beginning of the year 108 miscellaneous mineral cases; 673 were received, 700 decided, and 81 await action.

*Mineral contests.*—Exclusive of oil shale, Hoover Dam and Reservoir project, and the San Gabriel Canyon claims, there were 62 mineral contests pending on July 1, 1931; 121 were received and 129 disposed of, leaving 54.

*Coal.*—At the beginning of the year, 54 applications for coal permits, leases, and licenses were pending; 2,199 applications were received, 81 coal-prospecting permits issued for an area of 71,055.67 acres, 33 coal leases were made covering 3,330.72 acres, and 46 coal licenses were given for 1,747.93 acres. The total number of coal cases adjusted was 2,153; 100 remain.

*Potash.*—Potash leases in three cases, involving 6,808.59 acres, were granted and 102 potash permits for an acreage of 218,938.73 acres were issued under the act of February 25, 1920, as amended by the act of December 11, 1928.

*Sodium.*—One sodium lease covering 120 acres and 13 sodium permits for an area of 23,228.64 acres were issued. Of the 93 sodium cases on hand and 847 received, disposition was made of 880, leaving 60.

*Oil shale.*—Fifty-four field reports on oil-shale locations not embraced in patent proceedings failed to receive action during 1931; 1,367 were received, judgments were rendered affecting 1,372, and 49 were left over. Charges were directed against 14,395 locations embracing approximately 1,713,000 acres.

*Oil-shale contests.*—Undecided at the beginning of the year were 103 oil-shale contests, to which number were added 1,794 new cases. Judgments were rendered in 1,777, leaving 120 pending. Locations to the extent of 10,918 for 1,294,500 acres were declared null and void.

*Oil-shale applications.*—There were on hand at the beginning of the year 24 oil-shale applications for 186 claims affecting 29,932 acres. A claim embracing approximately 160 acres was received. Seven applications for 29 claims with acreage of 5,592 were rejected, and 4, including 34 claims for 5,321 acres, were passed to entry, leaving for consideration 14 applications covering 124 claims and an acreage of 19,179.

*Oil-shale entries.*—There were in the office at the beginning of the year 42 oil-shale entries involving 270 claims and 38,416 acres. Four entries were received for 34 claims embracing 5,321 acres. Approved for patenting were 23 entries for 139 claims and an acreage of 23,489.17. Twenty-three entries for 165 claims affecting 20,248 acres were not reached.

*Hoover Dam and Reservoir project.*—Field reports awaiting action at the beginning of the year were 43. The creation of the Federal reservation in Nevada in connection with the project considerably enlarged the area necessary to be examined, and 630 additional field reports were received, making a total of 673; of these, 648 were disposed of, leaving 25.

*Hoover Dam Reservoir contests.*—There were received 436 contests, which, with 5 on hand, totaled 441, affecting approximately 1,300 locations. There were adjudicated 428 contests involving 1,017 locations; 13 were not reached.

*San Gabriel Canyon claims.*—Mining claims in conflict with the rights of way of the cities of Los Angeles and Pasadena, Calif., for reservoir purposes in connection with their water supplies have interfered and are retarding the construction of necessary dams. It became necessary to cause examination to be made of such claims to determine their validity in order that all invalid claims situated in the area desired for construction purposes might be declared null and void. Examinations on the ground by representatives of this office resulted in reports that 246 of the locations were unlawful, and proceedings were instituted against them; 163 of such claims have been declared of no effect and 145 were finally disposed of, leaving 83 against which adverse proceedings are now pending. Default judgments were rendered in a majority of the cases, but hearings have been held in several instances. The Field Service reports that there are a large number of mining claims in the area covered by the rights of way to be examined. Ultimately action by this office will be necessary.

*Contest expenses.*—To effect legal service on numerous persons found from examination of the records to hold interests in the various claims situated in both the Hoover Dam and San Gabriel Canyon regions, it was necessary to publish notice of adverse proceedings in many cases. The publication of such notices added materially to the expense of the proceedings.

*Receipts under the mineral leasing act.*—The amount of \$3,236,978.35 was realized from bonuses, rentals, and royalties under the act of February 25, 1920, providing for the leasing of mineral rights on the public domain. Under the chapter relating to receipts and expenditures may be found the amounts received for the public lands situated in each State.

## LEASES

*Aviation fields.*—The devotion of public lands for aviation fields through leasing was authorized by the act of May 24, 1928 (45 Stat. 728). Eighty-two claims presented under this act were considered; 2 leases were canceled, 3 applications finally rejected and closed, 1 extension of time was granted on a lease for compliance with the terms thereof, and 7 applications for leases await the revocation of withdrawals involving the lands applied for. Leases were granted to the town of Saguache, Colo., for 555.25 acres and to Anchorage, Alaska, for 140.24 acres. Absolute control of the management and operation of certain lands in Arizona which were embraced in a lease for a municipal aviation field was assumed by the Government for military purposes, the Secretary of War being designated to exercise such control. Scattered tracts between the cities of Tucson, Ariz., and Los Angeles, Calif., embracing 1,600 acres of public lands, were withdrawn for emergency landing fields, beacon lights, and other aviation purposes.

*Air navigation sites.*—Small areas of public lands aggregating 2,552 acres in Arizona, California, Idaho, Nevada, Oregon, Utah, and Wyoming were withdrawn for use by the Department of Commerce as beacon sites or intermediate landing fields in the maintenance of air navigation facilities and 1,029 acres were released from such withdrawal.

*Fur farming.*—The public domain in the States is not subject to lease for fur-farming purposes, but the act of July 3, 1926 (44 Stat. 821), provides for the leasing of public lands in the Territory of Alaska for fur farming. There were considered 221 cases under this act; 7 leases were issued, 5 were canceled, the assignment of 1 lease approved, and 5 were authorized and await execution by the applicants. Twenty-four applications were finally rejected and closed. Reports from the field will be necessary in the consideration and the disposition of nine applications.

*Stock grazing, Alaska.*—Public lands of the Territory of Alaska may be leased for stock-grazing purposes pursuant to the provisions of the act of March 4, 1927 (44 Stat. 1452). One hundred and thirteen cases relating to stock-grazing matters in Alaska received action; 5 leases were issued, 5 authorized, 1 extension of time permitted for compliance with the terms of a lease, and 16 applications were finally rejected and closed. The remaining cases await reports from the field.

*Stock grazing, Mizpah and Pumpkin Creeks, Mont.*—The Secretary of the Interior, under the act of March 29, 1928 (45 Stat. 380), was authorized to enter into cooperative agreements with the State of Montana and private owners of lands lying between Mizpah and Pumpkin Creeks, Mont., for grazing and range developments. An association of stockmen within such area was duly organized. On January 4, 1932, regulations governing the said grazing district were approved. A lease was issued to the said association on May 9, 1932, for approximately 25,124 acres at a yearly rental of \$785.

*Stock grazing, Owens River Valley and Mono Lake Basin, Calif.*—Section 2 of the act of March 4, 1931 (46 Stat. 1530), allows the use of the land withdrawn under the said act for grazing purposes under such rules and regulations as the Secretary may adopt for the conser-

vation of the natural forage resources of the area involved. Under the act and the regulations relating thereto, 58 applications for grazing permits were filed, and of this number, 32 were granted, 3 were rejected, and the remainder held in suspension pending further field investigations. Several large tracts of vacant public lands adjacent to and between the areas affected by said act were withdrawn by Executive order of April 28, 1932, in aid of pending legislation.

*Mineral springs.*—Unreserved public lands in connection with mineral, medicinal, or other springs may be leased in conformity with the provisions of the act of March 3, 1925 (43 Stat. 1133). Seven cases of this character were considered, one rejected and closed, while the applicants in those remaining were required to submit additional evidence in support of their claims.

*City of Bismarck, N. Dak.*—Sibley Island in the Missouri River may be leased to the city of Bismarck, N. Dak., for park purposes under the act of June 11, 1896 (29 Stat. 413, 435). An extension of time was granted within which the city might comply with the terms of the lease, and further action thereon was deferred pending a report from the Field Service as to compliance with the lease terms.

*Oil, gas, coal, potash, phosphates, etc.*—Activities under the mineral leasing act of February 25, 1920 (41 Stat. 437), title 30, chapter 1, section 181 U. S. C., are set forth in detail under Minerals and Mining Claims, while the receipts and the States within which the lands affected are situated appear under Receipts and Expenditures.

### STATE, COUNTY, OR CITY RECREATIONAL AREAS

Five withdrawals were made by the department for recreational classification under the act of June 14, 1926 (44 Stat. 741), aggregating 822 acres, based on one county and four State petitions. Of the withdrawn area, 200 acres are revested Orgeon & California Railroad lands and were withdrawn under said act as amended by the act of April 13, 1928 (45 Stat. 429).

There were sold under the recreation law 200 acres to Marion County, Oreg.; 200 acres to the city of Cheyenne, Wyo.; and 170 acres to the State of California, and 206 acres were leased to the State of Oregon. The area classified as nonrecreational and released from withdrawal was 5 acres.

### STOCK DRIVEWAYS

Nine new stock driveways were established under section 10 of the act of December 29, 1916 (39 Stat. 862), as amended January 29, 1929 (45 Stat. 1144), 31 modified, and 1 revoked. The area withdrawn was 84,980 acres, and that released from such withdrawals 7,595 acres.

The total gross area included in driveway withdrawals is 9,535,955 acres and is distributed by States as follows: Arizona, 500,500 acres; California, 36,829 acres; Colorado, 217,099 acres; Idaho, 822,797 acres; Montana, 234,008 acres; Nevada, 3,567,052 acres; New Mexico, 1,102,084 acres; Oregon, 456,465 acres; South Dakota, 22,155 acres; Utah, 1,254,960 acres; Washington, 10,919 acres; Wyoming, 1,311,087 acres.

### NATIONAL FORESTS

Two forests were created and 2 enlarged under the act of March 1, 1911 (36 Stat. 961); 8 were reduced, 5 abolished, and 15 interforest transfers effected under the act of June 4, 1897 (30 Stat. 34, 36). Two forests were enlarged and 1 reduced by special acts of Congress; 15 were enlarged under the general national forest exchange act of March 20, 1922 (42 Stat. 463). Recomputation of the areas of certain national forests, due to recent surveys, decreased the estimated total of last year by 122,457 acres. The changes made effected a gross addition of 1,434,670 acres and exclusion of 470,996 acres. The areas within existing national forests acquired under the act of March 1, 1911 (36 Stat. 961), were 478,053 acres.

There are 148 national forests embracing 186,215,256 acres, of which a little over 86 per cent is United States land. The net addition to national forest areas was 963,674 acres. The areas now embraced in withdrawals for forestry purposes, or in aid of forest reservation legislation, are 355,122 acres.

There are 169,744 acres withdrawn as administrative sites, 150,735 acres thereof being in and 19,009 acres near national forests.

### INDIANS AND INDIAN LANDS

*Fee and trust patents.*—Fee and trust applications for the benefit of the Indians were examined in 3,295 cases, and 710 fee and 1,555 trust patents were issued.

*Indian homesteads.*—The act of March 3, 1875 (18 Stat. 420), as amended by the act of July 4, 1884 (23 Stat. 96), made provisions for homestead entries by Indians. Thirty-three such cases were considered and one patented.

*Allotment applications.*—The allowance of allotments to Indians not residing upon a reservation or for whose tribes no reservation has been provided was authorized by section 4 of the act of February 8, 1887 (24 Stat. 388), as amended. Adjudications of 467 cases under the foregoing acts resulted in the issuance of 26 patents.

*Eskimos and natives of Alaska.*—Allotments to Eskimos and natives of Alaska were permitted by the act of May 17, 1906 (34 Stat. 197). Eighty-six applications for such allotments were considered, but no final action was taken.

*Pueblo Indian lands.*—The quieting of title to lands within Pueblo Indian grants in New Mexico was provided for by the act of June 7, 1924 (43 Stat. 636). There were 329 non-Indian land cases adjusted thereunder and 265 patents granted.

*Preemptions.*—The preemption laws were repealed by section 4 of the act of March 3, 1891 (26 Stat. 1096). However, the repealing act did not affect the right to make preemption entries in the former Ute Indian Reservation in western Colorado under agreement of June 15, 1880 (21 Stat. 203), and the act of July 28, 1882 (22 Stat. 178), and a few tracts in the former Osage Indian Reservation which are subject to be taken under section 2 of the act of May 28, 1880 (21 Stat. 143), being Osage trust and diminished reserve lands. Preemption claims were considered in 47 instances and 3 patents granted.

*Ceded Indian land sales.*—Extensions of time for payment of the amounts due on December 31, 1931, under the act of February 14,

1932 (46 Stat. 1107), were granted on approximately 1,000 purchases and entries of lands in the ceded Cheyenne River and Standing Rock Indian Reservations in North and South Dakota. Some lands in the White Earth Reservation in Minnesota were restored from the withdrawal of July 13, 1926, and homestead entries for such lands were allowed on equitable grounds. Action was taken with a view to revoking the said withdrawal for the purpose of opening new lands to entry in the ceded Chippewa Indian Reservations, Minn. On Sept. 4, 1931, lands in the ceded south half of the Colville Indian Reservation, Wash., which had been subject to entry for five years or more, were withdrawn under the act of May 17, 1926 (44 Stat. 558), with certain exceptions. Some lands in this reservation were classified and appraised and opened to homestead entry. Extensions of time for the payment of sums due were granted on many entries involving lands in the ceded Fort Peck Indian Reservation, Mont. A tract of land in this reservation was sold to the trustees for school district No. 73, Sheridan County, Mont., under section 11 of the act of May 30, 1908 (35 Stat. 558).

*Pyramid Lake Indian lands, Nevada.*—The act of June 7, 1924 (43 Stat. 596), authorized the sale to certain settlers, or their transferees, of approximately 3,800 acres of land in the Pyramid Lake Indian Reservation, Nev., where such lands had been settled upon and occupied for 21 years. Purchases were made by a number of white settlers at prices fixed by appraisals. It was later contended that the charges made against such settlers were unreasonably high, and in a number of instances, there was a failure to make payment for any but the first installment. Action looking to the collection of the appraised prices was suspended by Senate Resolution No. 142 of January 22, 1932, pending an investigation of the matter.

*Umatilla Indian Reservation, Oreg.*—In the ceded Umatilla Indian Reservation, Oreg., 4,419 acres were temporarily withdrawn pending a determination whether such lands should be returned to the Indians.

There were 2,441 cases involving the ceded Indian lands receiving action. Twenty-five patents were issued for homesteads and 97 for sales of ceded Indian lands.

*Indian exchanges.*—The consolidation of Indian reservations by permitting the exchange of privately owned lands within the limits of an Indian reservation for vacant, nonmineral, nontimbered surveyed public lands of equal value and area in the same State is provided for by the act of April 21, 1904 (33 Stat. 211). This type of exchange was considered in 249 cases, and 18 patents were issued. Private title to 2,080 acres in Indian reservations was extinguished.

The act of May 23, 1930 (46 Stat. 378), eliminated certain lands from the Tusayan National Forest in Arizona, and added such lands to the Western Navajo Indian Reservation, and provided for exchanges of any of such lands as were privately owned for an equal value of surveyed, vacant, unreserved, nonmineral public lands in Arizona. Thirteen cases under this act were considered, and further action thereon awaits reports from the Field Service as to the character of the selected lands and the equal values of the offered and selected lands.

*Chippewa logging, Minnesota.*—There are four uncompleted contracts for timber on ceded Chippewa Indian land in Minnesota, purchased at sales pursuant to the act of January 14, 1889 (25 Stat. 642),

as amended by the act of June 27, 1902 (32 Stat. 400). Extensions of time on three of these contracts expire on July 1, 1932, while action on an application for extension of the other contract was taken during the year. Several inquiries relative to the sale of timber on ceded Chippewa Indian lands were received and considered. One case of timber trespass on such lands was disposed of during the year.

*Court of Claims data.*—The compilation of data concerning ceded Indian lands involved in suits before the Court of Claims is progressing as rapidly as the intricacies of the work will permit. The final analysis of the Great Sioux case has been made, and the report under the cooperative agreement with the Department of Justice, the General Accounting Office, and this office has been submitted to the court. The data requested by the court in the case of Dwamish et al. has been submitted to the Commissioner of Indian Affairs. Report has also been submitted to the Commissioner of Indian Affairs in the case of Kansas or Kaw Indians, and the analysis in case of Chippewas of Minnesota, made special by request of the Department of Justice, is nearing completion. The following claims are now pending and will be examined in the order suggested by the Department of Justice: Saginaw et al., Chippewas of Minnesota, Steilacoom, Arapahoe and Cheyenne, Nez Perce, Coos Bay, Indians of California, Quinaielt, Joseph's Band of Nez Perce Tribe, Ponca Tribe in Oklahoma and Nebraska, Lower Chehalis, and Pillager Indians.

### CONTESTS

*Miscellaneous.*—Included in this group are all contests, both Government and private, involving claims to public lands, except those affecting minerals or mining claims or lands situated in the Hoover Dam project or the San Gabriel Canyon, Calif. There were in the office awaiting action at the beginning of the fiscal year 412 such contests; those received numbered 1,844; judgments were rendered in 1,714, leaving 542.

(a) *Mineral contests.*—Affecting mineral lands generally, there were 62 contests awaiting action at the beginning of the year; 121 were received, 129 decided, and 54 not reached.

(b) *Oil-shale contests.*—Left over from last year were 103 oil-shale contests; 1,794 were received, 1,777 decided, and 120 not considered.

(c) *Hoover Dam project.*—Five were pending June 30, 1931; 436 were received, 428 decided, and 13 remain.

(d) *San Gabriel Canyon claims.*—Proceedings were instituted against 246 claims in the San Gabriel Canyon, Calif.; disposition was made of 163 of these claims, leaving 83 for further action. The totals include 4,211 contest cases decided and 812 awaiting consideration.

### RIGHTS OF WAY

*Railroad rights of way.*—Applications received for railroad rights of way numbered 116, which, added to the 5 pending, made a total of 121. Of these, 26 were approved and requirements made in 81, leaving 14.

*Stock-watering reservoirs.*—There were received 72 reservoir declaratory statement applications; requirements were made in 8 cases and 59 were otherwise disposed of; 5 were not reached.

*All other rights of way.*—Irrigation, telegraph, telephone, public road, pipe-line, etc., applications to the extent of 623 were received, which, added to 7 on hand, made a total of 630. Of this total, 151 were approved, 27 canceled, 81 otherwise disposed of, and requirements made in 358, leaving 13. One hundred and fifty-six maps of approved rights of way in forest and Indian reservations were received from the Forest Service and Indian office and approvals promulgated. Thirty memoranda or opinions were submitted to the department on rights-of-way matters referred by the department to this office for consideration.

*Forfeiture.*—The number of approved rights of way of all kinds which were awaiting office action July 1, 1931, was 55; those received, 718. Of these, proof of construction was accepted on 43, there were canceled by relinquishment or default 84, requirements were made in 462 cases, and 169 were otherwise disposed of. Six suits were recommended and 10 decrees of forfeiture obtained as a result of previous recommendations. Twenty-seven suits are pending in the Department of Justice.

### HYDROELECTRIC POWER

Based on applications made for restoration from power-site withdrawals and classification, 106 restorations, in accordance with the terms and conditions of section 24 of the Federal water power act, were promulgated; 54 hydroelectric power project applications were transmitted to the General Land Office by the Federal Water Power Commission involving public lands and lands within national forests in 12 States and the Territory of Alaska.

The area in each State is shown in the following table:

*Withdrawals made under Federal water power act, fiscal year 1932*

State or Territory	Total prior to July 1, 1931	Fiscal year 1932	Total to date	State or Territory	Total prior to July 1, 1931	Fiscal year 1932	Total to date

### RECLAMATION

*Federal reclamation projects.*—The Federal reclamation projects in 14 western public-land States number 31, of which number 19 are operated in whole or in part by irrigation districts and water users' associations. There are also 5 Indian reclamation projects, the irrigation features of which are under the supervision of the Bureau of Indian Affairs; 2,242 entries of various kinds were received and 1,953 were considered. Approximately 700 letters of inquiry were answered.

(a) *Original reclamation homestead entries.*—Pending from previous year, 38; received, 686; examined and accepted, 131; canceled, 22; claimants required to furnish additional evidence, 249; otherwise disposed of, 265; remaining, 57.

(b) *Assignments.*—Brought over, 84; received, 295; examined and accepted, 145; rejected, 5; additional evidence called for, 90; otherwise disposed of, 77. There remained for consideration 62 cases.

(c) *Reclamation homestead entries on which final certificates issued.*—In addition to 126 on hand there were received 474; approved for patenting, 240; canceled, 2; additional requirements made, 114; otherwise disposed of, 196; not adjudicated, 48.

(d) *Miscellaneous.*—Cases not reached last year, 45; received, 344; examined and accepted, 75; rejected, 7; additional requirements made, 85; otherwise disposed of, 134; awaiting action, 88. Under the term "miscellaneous" are included applications for extension of time; proofs submitted by claimants in support of their entries as to residence, improvement, and cultivation; applications to submit proof outside of the land district in which the lands in the entry are located; and applications to amend or conform the entry to an established farm unit. There were also approximately 52 new farm units established at the request of the entrymen, in order to enable them to exchange their entries to entries for other lands under the various exchange acts. This included 14 applications to exchange or amend entries upon which patents had already issued.

(e) *Land and water-right applications in part 1, Mesa unit of the Yuma project.*—In office June 30, 1931, 4; received, 14; accepted, 2; canceled, 1; additional evidence required, 6; otherwise disposed of, 5; not reached, 4.

(f) *Desert-land entries receiving water.*—Consideration was given 40 desert-land entries receiving water for irrigation purposes from Federal reclamation projects. Thirty entries are awaiting action.

(g) *Withdrawals and restorations.*—There were promulgated 29 orders of restoration and 11 orders of withdrawal under the reclamation act, one change of the form of withdrawal, and one order setting aside 20 acres of reclamation withdrawn lands in Arizona for a community center. The area restored in the various States totals 3,399,400 acres; the area withdrawn amounts to 1,250,640 acres. The change of form of withdrawal affects 200 acres.

There were six openings to entry, subject to the reclamation act, of a total of 140 irrigated farm units, as follows:

Project and date of order:	Farm units
Klamath, Oct. 16, 1931.....	66
Minidoka, Oct. 29, 1931.....	23
Belle Fourche, Jan. 29, 1932.....	1
Vale, Feb. 9, 1932.....	3
Riverton, May 2, 1932.....	43
Sun River, May 27, 1932.....	4
Total.....	140

*Fort Hall project.*—Five cases came up for consideration involving sales of water rights for lands in white ownership in the Fort Hall Indian irrigation project under the act of March 1, 1907 (34 Stat. 1024).

Five irrigation districts were accepted under sections 1 and 2 of the act of May 15, 1922 (42 Stat. 541), permitting the issuance of patents

for lands within the district without reservation for a lien under the act of August 9, 1912 (37 Stat. 265).

*Reports, Geological Survey.*—Requests were made in 410 cases to the Geological Survey for No. 349 reports as to the oil and gas character of the lands involved, and 350 reports were received.

Under recent acts of Congress, lands embraced in reclamation homestead entries in support of which final proof as to residence, improvement, and cultivation has been submitted and accepted are, even prior to the issuance of patent, subject to taxation by the State and county in which the lands are located; for this reason entrymen are expediting compliance with the reclamation law, to the end that they may obtain patents, and, accordingly, before claimants of this kind of land are permitted to exchange their entries they must show payment of all taxes due.

*State irrigation districts.*—Two State irrigation districts were approved as dependable sources of water supply for desert-land entries; 2 were received, 3 formerly so approved were reopened, 3 were rejected, and 11 are now pending.

*State irrigation districts (acts August 11, 1916, and May 15, 1922; 39 Stat. 506, 42 Stat. 541).*—Since passage of these acts applications by 79 districts for approval under the act of August 11, 1916, have reached this office. One application involving 9,605.29 acres was approved and one application involving 27,665 acres was rejected. In all a total of 59 applications involving 2,441,863.69 acres have been approved and 17 applications involving 351,073.09 acres have been rejected. Three applications are pending. Four contracts under the act of May 15, 1922, were promulgated.

*Private irrigation projects.*—Four private irrigation companies were approved as dependable sources of water supply for desert land entries, 8 new cases were opened, 13 formerly so approved were reopened, 5 were rejected, and 24 are now pending. Since adoption of the regulations of September 30, 1910 (39 L. D. 261), 1,418 projects have come before this office on reports from field representatives. There were also received seven reports from the Geological Survey bearing upon the water supply of these projects.

*Desert land.*—There were received 2,644 cases under the desert land laws; 86 were pending; approved, 359; canceled, 392; requirements made in 1,097; otherwise disposed of, 693; not decided, 189. Of the 359 approved, 123 were approvals for patenting and were subsequently patented.

*Carey Act.*—Carey Act withdrawals, segregations, and patents, amounting to 915,676.22 acres, were considered, on which either interlocutory or final action was taken. The total area now remaining segregated and unpatented is 238,923.23 acres. The total area now withdrawn under the act of March 15, 1910 (36 Stat. 237), is 34,930.15, and 635,896.42 acres applied for under this act are pending.

*Pittman Act.*—There were pending 13 applications, and 217 were received; 62 were approved, 55 canceled, 46 referred to the Geological Survey as petitions for designation, and 55 otherwise disposed of, leaving 12 awaiting office action. One patent was issued and a number of other cases upon which final proofs have been submitted are in the field for investigation.

*Swamp and overflowed lands.*—There were made ready for consideration during the past fiscal year claims under the grants of swamp

and overflowed lands for 175,375.25 acres. This amount added to 105,813.66 acres, claims for which were pending on June 30, 1931, makes a total of 281,188.91 acres. Of this area, 4,807.28 acres were patented to States, and selections for 146,865.84 acres were rejected, making a total of 151,673.12 acres disposed of. Selections involving 129,515.79 acres are awaiting action in regular order of business, with a view to patenting or rejecting the same, as may be found proper, under the law and upon the facts presented.

*Arkansas and Minnesota drainage.*—The act of May 20, 1908 (35 Stat. 169), and the act of January 17, 1920 (41 Stat. 392), provided for the taxation for drainage purposes and sale by the States of Minnesota and Arkansas on nonpayment thereof, of public lands for which final certificates have not been issued. The lands so sold by the States can be entered at the district land offices by the purchaser upon payment of \$1.25 per acre. Under these acts 19 cases in Arkansas and 166 cases in Minnesota were considered, and in the latter State 4 patents were granted.

### WITHDRAWALS AND RESTORATIONS

During the year 6,049,905.80 acres of public lands were placed in a state of reservation, either by Executive or departmental order, under various applicable acts, for the purposes set forth in the several orders, and 3,619,457.07 acres theretofore reserved were restored to entry or other disposition.

*Blanket withdrawals.*—In some instances the reservations were in the nature of blanket withdrawals, without taking into account certain tracts which had been theretofore entered or patented, so that the totals given do not represent with absolute accuracy the amount of public, unentered, or undisposed-of land affected.

New withdrawals and restorations follow.

*Stock driveways.*—The area withdrawn for stock driveway purposes aggregated 84,980 acres, and that released from such withdrawals 7,595 acres.

*Air navigation sites.*—Small areas of public land amounting to 2,552 acres in Arizona, California, Idaho, Nevada, Oregon, Utah, and Wyoming were withdrawn for use by the Department of Commerce as beacon sites or intermediate landing fields in the maintenance of air navigation facilities, and 1,029 acres were released from such withdrawals.

*National forests.*—There were added to national forests 1,434,670 acres, and 470,996 acres were excluded. Within the exterior boundaries are now 186,215,256 acres, of which a little over 86 per cent is federally owned.

*National monuments and parks.*—The additions to national monuments and parks amounted to 302,205 acres, 280,970 acres of which are public; 54,205 acres were temporarily withdrawn for monument or park classification, 46,034 acres of which were reserved.

*Recreational.*—Public lands aggregating 822 acres were withdrawn for recreational classification at the instance of States or counties, and 5 acres were restored from withdrawal for such purpose.

*Wild-life refuges.*—The additions to wild-life refuges from the public domain amounted to 2,518 acres, and 3,976 acres were withdrawn for such classification.

*Los Angeles (Calif.) water supply.*—Among the withdrawals prepared in connection with rights-of-way matters was the withdrawal made by Executive order of approximately 2,748,000 acres in California and 708,870 acres in Nevada, pending definite location of transmission line to convey power from Hoover Dam to the city of Los Angeles.

*Coal.*—There were withdrawn 10,880 acres of coal lands. Total withdrawals of such land embrace 29,676,854 acres.

*Power-site reserves.*—A total of 157,978 acres theretofore withdrawn for power-site purposes were restored to entry, leaving in reserve on July 1, 1932, 2,254,235 acres. Those classified as valuable for hydro-electric power purposes totaled 36,687 acres, and 6,661 acres were restored to entry. On July 1, 1932, there were classified and reserved from entry or other disposal 1,624,395 acres.

*Water-power designations.*—Forty acres were restored to entry, making a total now designated under the Arizona and New Mexico enabling act and the Oregon & California Railroad Co. revestment act of 1,070,791 acres.

*Reservoir sites.*—No withdrawals were made for reservoir sites, and 40 acres were restored therefrom during the year; 254,010 acres are now so withdrawn.

*Public water reserves.*—There were withdrawn as public water reserves 9,855 acres, and 400 acres theretofore withdrawn were restored to entry. On July 1, 1932, there were 437,229 acres held in public water reserves in 12 public-land States in addition to the lands surrounding springs and water holes on either surveyed or unsurveyed public lands.

*Indian power reserves.*—On July 1, 1932, 271,575 acres were withdrawn under the act of June 25, 1910 (36 Stat. 855, 858).

*Reclamation.*—Under the act of June 17, 1902, 1,250,640 acres were withdrawn for reclamation purposes, and 3,399,400 acres theretofore withdrawn were restored.

*Miscellaneous.*—A total of 615,843.80 acres of land were placed in a state of reservation for various purposes, other than those hereinbefore referred to, either by Executive or departmental order, and 275.07 theretofore reserved were restored.

## STATE GRANTS AND STATE SELECTIONS

*Indemnity.*—Selections of school lands, including new selections and those in connection with which requirements had been made, approximating 725,010 acres, were received, which, in addition to 57,670 acres in the office July 1, 1931, totaled 782,680 acres. Of this amount, 78,617 acres were approved and title conveyed to the States, 11,782 acres were canceled, requirements made as to 534,746 acres, and 12,267 acres otherwise disposed of, leaving 145,268 acres awaiting consideration.

*Quantity selections under grants for specific purposes.*—New selections for 119,547 acres, and selections in connection with which requirements had been made embracing 150,785 acres, together with 48,182 acres not theretofore considered, total 319,514 acres; 132,613 acres were approved and title conveyed to the States. Selections embracing 3,212 acres were canceled; requirements were made as

to 122,862 acres, and 1,131 acres otherwise disposed of, leaving 59,696 acres.

*Minerals reserved.*—Conveyances amounting to 6,735 acres were made to the States, with reservation of certain mineral deposits to the United States, including coal, phosphate, oil, gas, and potash, and, in addition thereto, 13,423 acres were conveyed to the State of Nevada with a reservation to the United States of all mineral deposits therein.

*Cooperative agreements.*—Title to 14,324 acres was conveyed to certain States under cooperative agreements providing for the exchange of school-section lands within the boundaries of national forests for other lands within such boundaries. In all, there has been conveyed to the States pursuant to such agreements an aggregate of 833,723 acres.

New legislation has been enacted by the Seventy-second Congress which will increase the work of adjudication of State selections. One of these acts, approved May 2, 1932, amended the act of January 25, 1927, which grants certain mineral school-section lands to States and provides for the relinquishment of certain indemnity school-land selections and revesting of title in the State to the school-section lands assigned as base. By an act approved May 7, 1932, amending the enabling act admitting into the Union the States of North and South Dakota, Montana, and Washington, it is provided that certain exchanges of State-owned lands may be made, in order to consolidate the States' holdings, which will make additional work of adjudication. Also an additional grant of 76,667 acres has been made to the State of New Mexico for normal school purposes by an act approved March 31, 1932, which lands are to be selected from the public lands within the State.

*School sections.*—The act of January 25, 1927 (44 Stat. 1026), grants mineral school sections to the various States, and in determining whether such sections passed to the State under the original granting act or the act of 1927, adjudications were made involving 176,677.23 acres. Title to 640 acres was held to remain in the United States, 150,211.06 acres found to have passed to the States under the original grant, 24,243.26 acres under the act of January 25, 1927, and 1,582.91 acres passed to the States, but in which the office declined to specify the act.

The following table shows the adjudication in detail:

State	Title in United States	Title in State under original grant	Title in State under act of Jan. 25, 1927	Title in State under original grant or act of Jan. 25, 1927
	<i>Acres</i>	<i>Acres</i>	<i>Acres</i>	<i>Acres</i>
Alaska.....		3, 298. 04		
Arizona.....		75, 422. 94	2, 177. 39	1, 383. 18
California.....			320. 00

New Mexico.....		33, 149. 79	16, 686. 00	199. 73
Utah.....	640. 00	8, 650. 63	2, 139. 87	
<b>Total.....</b>	<b>640. 00</b>	<b>150, 211. 06</b>	<b>24, 243. 26</b>	<b>1, 582. 91</b>

## RAILROAD GRANTS AND SELECTIONS

Railroad and wagon-road listings and selections were received to the extent of 288,714.02 acres; 62,344.78 acres were certified or patented in satisfaction of such grants; 1,746.43 acres of selections were rejected. The total acreage adjudicated was 287,150.19.

*Northern Pacific Railway Co.*—The act approved June 25, 1929 (46 Stat. 41), altered and amended the land grants to the Northern Pacific Railroad (now Railway) Co. under the act of July 2, 1864 (13 Stat. 365), and the joint resolution of May 31, 1870 (16 Stat. 378), declared forfeited certain claimed rights of the company and directed the institution and prosecution of proceedings looking to the adjustment of the grants and for other purposes. The suit authorized by said act has been instituted by the Attorney General in the District Court of the United States for the Eastern District of Washington, Northern Division, equity No. 4389. Responding to requests of the Attorney General, maps, diagrams, copies of papers, and tabulations, covering some of the points involved in the grants to the company, were prepared and transmitted to the Department of Justice. A preliminary hearing on the points of law involved was held during the month of May at Spokane, Wash., before a special master appointed by the Federal court. To date no decision has been announced.

*Railroad adjustment.*—The work of adjusting the following four railroad grants was completed: St. Paul & Pacific, St. Joseph & Denver City, Atlantic & Pacific (western division), and Atlantic & Pacific (eastern division) Railroad Cos. Two of said adjustments, the St. Joseph & Denver City and the Atlantic & Pacific (eastern division), were approved and the grants closed. The adjustments of the other two grants were approved by the Secretary, but the grants have not yet been closed.

One grant, the adjustment of which was reported as completed in 1929, was also closed, viz, Amboy, Lansing & Traverse Bay Railroad Co. (north of Lansing).

The adjustment of the above first four mentioned grants completed either as final or as tentative the adjustment of all of the 72 unforfeited railroad grants. Sixty-two of said grants have been finally adjusted and the grants formally closed by the Secretary, leaving 10 in which tentative adjustments have been completed but remain to be closed, viz, Cairo & Fulton, Memphis & Little Rock, Union Pacific, St. Paul & Pacific, Central Pacific, California & Oregon, Atlantic & Pacific (western division), Southern Pacific (branch line), Southern Pacific (main line), and Northern Pacific Railroad Cos.

In connection with the adjustment and closing of the land grant to the Leavenworth, Pawnee & Western Railroad Co., to which the Union Pacific Railroad Co. succeeded, 19,910.00 acres of land in Colorado within the limits of the grant were restored to the public domain. Claims were alleged to all this land by various parties, based on different states of fact, principally color of title by virtue of purchase from the railroad company. The act of May 14, 1932 (Public, No. 135), provides a method by means of which claimants may file applications for United States patents. In connection with action on such applications their claims will be adjudicated. Regulations were approved on June 11, 1932, Circular No. 1272.

## REVESTED OREGON & CALIFORNIA RAILROAD AND COOS BAY WAGON ROAD GRANT LANDS

The act of June 9, 1916 (39 Stat. 218), revested in the United States the titles to certain lands formerly granted to the Oregon & California Railroad Co., and provided that the lands should be separated into three groups or classes, to wit: (1) Power sites, (2) timber, (3) agricultural lands. The classifications made under said act and the status of the lands June 30, 1931, were as follows:

1. Power-site lands: 56,682.49 acres, containing 825,421,000 feet board measure of timber, are embraced in power projects or withdrawals for power-site purposes. The Federal Power Commission has jurisdiction over these projects and withdrawals under the Federal water power act of June 10, 1920 (41 Stat. 1063). The timber thereon is, however, subject to sale under the act of June 4, 1920 (41 Stat. 758), in the same manner as timber on land classified as timberland in character under the provisions of the said act of June 9, 1916.

2. Timberlands: 2,944,334,000 feet board measure of timber on 97,588.63 acres have been sold and patented to private individuals and corporations in the manner provided by the revestment act and acts amendatory or supplemental thereto; 30,525,478,000 feet board measure of timber on 1,133,537.24 acres remain unsold.

3. Agricultural lands: (1) 1,073,523.91 acres have been classified as agricultural in character, with a present status as follows:

- (a) 211,114.65 acres have been patented.
- (b) 83,493.92 acres are embraced in pending entries.
- (c) 761,284.05 acres are vacant but subject to entry.

(2) Cut-over lands:

- (a) 1,755.24 acres have been patented.
- (b) 3,801.26 acres are embraced in pending entries.
- (c) 11,474.79 acres are vacant and subject to entry.

Under the acts of June 14, 1926 (44 Stat. 741), and April 13, 1928 (45 Stat. 429), 8,193.66 acres are withdrawn for recreational purposes at the instance of municipalities and the State of Oregon.

The foregoing does not embrace the areas within the indemnity limits of the grant to the Oregon & California Railroad Co. which at the date of the revestment act, June 9, 1916, were unsurveyed and included in national forests. These lands are discussed under item 13-k in the decree of September 15, 1925, of the District Court of the United States for the District of Oregon in the case of *United States v. Oregon & California Railroad Co.* (8 Fed. Rep., second series 645). These lands are now surveyed, and the total acreage has been found to be 528,004.18. Such lands have not been cruised or classified, and no information as to their character or value can be furnished. They were, however, before survey paid for as revested lands at the rate of \$2.50 per acre, in conformity with such court decree.

## REACQUIRED COOS BAY WAGON ROAD GRANT LAND

(Act of February 26, 1919 (40 Stat. 1179))

The lands acquired from the Southern Oregon Co., formerly granted to aid in the construction of the Coos Bay Wagon Road, have been classified as follows:

1. Power site, 4,543.67 acres. These power-site lands contain 181,460,000 feet board measure of timber. The timber, however, is subject to sale under the act of June 4, 1920 (41 Stat. 758).

2. Timber land, 55,963.77 acres, containing 2,171,857,000 feet board measure of timber. Of this, 15,068.83 acres, containing 615,854,000 feet of timber, have been sold to private individuals and corporations under the acts of February 26, 1919 (40 Stat. 1179), June 4, 1920 (41 Stat. 758), and May 17, 1928 (45 Stat. 597), leaving 40,894.94 acres with a stand of 1,556,003,000 feet board measure of timber unsold.

3. Coos Bay Wagon Road agricultural lands, 34,147.95 acres, have been classified as agricultural. Of this area, 8,841.15 acres have been patented; 7,871.25 are embraced in pending entries; 17,435.55 acres are vacant.

Transactions concerning revested Oregon & California Railroad and Coos Bay Wagon Road grant lands for the fiscal year ended June 30, 1932, follow.

*Restoration of Oregon and California lands to homestead entry.*—Revested Oregon & California Railroad grant lands within the Lakeview and Roseburg land districts in Oregon, comprising 4,244.19 acres, were restored to homestead entry, which, with restorations heretofore reported, make a total of 1,073,523.91 acres, less 200 acres withdrawn for recreational purposes and 400 acres reclassified as timber land, leaving a net area of 1,072,923.91 acres. This total includes 17,031.29 acres of cut-over lands, 1,755.24 acres of which have been patented; 3,801.26 acres are embraced in pending entries, and 11,474.79 acres are vacant. Said total also shows the following with respect to lands classified as agricultural in character: 211,114.65 acres patented, 83,493.92 acres embraced in pending entries, and 761,284.05 acres are vacant.

*Restoration of Coos Bay Wagon Road lands to entry.*—Reconveyed Coos Bay Wagon Road lands within the Roseburg land district, comprising 2,929.80 acres, have been restored to homestead entry, which, with restorations heretofore reported, make a total of 34,307.95 acres, less 160 acres reclassified as timber land, leaving a net area restored of 34,147.95 acres. This total includes 8,641.15 acres of patented agricultural lands; 7,311.25 acres embraced in pending entries; 14,945.75 acres of vacant lands, and 3,249 acres of cut-over lands, 200 acres of which have been patented, 560 acres embraced in pending entries, and 2,489.80 acres are vacant.

*Oregon and California timber sales.*—Pursuant to the provisions of the acts of June 9, 1916 (39 Stat. 218), and May 17, 1928 (45 Stat. 597, Public Nos. 415 and 417), 26 sales of timber were made involving 1,789.66 acres of land, containing 58,645,000 feet board measure of timber, for which the sum of \$92,460.75 was received. Total sales to date, 821, involving 107,976.88 acres, containing 2,418,622,980 feet board measure of timber, for which a total of \$6,001,610.39 has been received.

*Coos Bay timber sales.*—Under the provisions of the acts of June 9, 1916 (39 Stat. 218), February 26, 1919 (40 Stat. 1179), and May 17, 1928 (45 Stat. 597, Public Nos. 415 and 417), two sales of timber were made involving 160 acres of land, containing 7,105,000 feet board measure of timber, for which the sum of \$17,332.50 was received. Total sales to date, 98, involving 17,380.78 acres, containing 693,177,000 feet board measure of timber, for which a total of \$1,609,947.34 has been received.

*Claims under color of title.*—Two applications, one for 1.16 acres and the other for 2.36 acres of revested Oregon & California Railroad grant land, classified as agricultural in character and claimed under the so-called color of title act of December 22, 1928 (45 Stat. 1069), have been asserted, but so far the applicants have not met the requirements made.

*Extension of time in which to cut timber granted.*—Under the provisions of the act of May 19, 1930 (46 Stat. 369), authorizing the Secretary of the Interior to extend the time for cutting and removing timber from revested and reconveyed lands in Oregon under the acts of June 9, 1916 (39 Stat. 218), and February 26, 1919 (40 Stat. 1179), three extensions have been granted, involving 1,913.79 acres, in accordance with the terms provided by Circular 1235 of January 23, 1931.

*Exchanges.*—Through the consummation of one exchange of revested Oregon & California Railroad timber land, patent issued for 3,200 acres under the act of May 31, 1918 (40 Stat. 593), in lieu of 6,139.97 acres. Another exchange selecting 13,355.81 acres in lieu of 12,478.67 acres was held for rejection and is pending on appeal.

*Recreational act.*—Under the recreational act of June 14, 1926 (44 Stat. 741), as extended to the revested Oregon & California Railroad grant lands and the reconveyed Coos Bay Wagon Road lands by the act of April 13, 1928 (45 Stat. 429), 200 acres of revested Oregon & California Railroad lands and 160 acres of reconveyed Coos Bay Wagon Road lands were withdrawn. One lease was made covering 206.40 acres and one cash purchase of 200 acres of revested Oregon & California Railroad grant lands was made.

*Oregon and California tax unit (act July 13, 1926, 44 Stat. 915).*—Payments to 18 counties in the State of Oregon in lieu of taxes, involving approximately 2,300,000 acres of land, title to which revested in the Government under the act of June 9, 1916 (39 Stat. 218), are made by the United States under the act of July 13, 1926 (44 Stat. 915). The rates are fixed by lawful annual levies on these lands in the same manner as those held in private ownership in the several counties, and the valuations are those used by the Secretary of the Interior in computing the accrued taxes for the year 1915, as reduced by disposal made since 1915.

The counties present their claims annually, and they are checked and audited by this office and certified to the Secretary of the Treasury for payment in the amounts found to be due. It is necessary to determine from the records and the proofs submitted not only the State and county taxes but also whether the land is subject to the school, high-school, road, port, or other special district tax claimed. A special set of records is kept where each disposal of revested land is noted. The auditing and adjudication of the claims has resulted

in net deduction on all claims, or savings to the Government of approximately \$310,000.

Following is a résumé of claims on hand July 1, 1931, and of the claims received and disposed of during the fiscal year 1932:

Claims pending July 1, 1931:	
9 claims, year 1930.....	\$254, 705. 91
Claims received, fiscal year:	
5 claims, year 1930.....	129, 044. 31
12 claims, year 1931.....	383, 028. 23
Total.....	512, 072. 54
Claims certified, fiscal year:	
14 claims, year 1930.....	383, 189. 64
9 claims, year 1931.....	308, 016. 42
Total.....	691, 206. 06
Net disallowance in above claims.....	2, 369. 31
3 claims, year 1931, pending at end of fiscal year.....	73, 203. 08

NOTE.—Four claims for the year 1930 were certified during the fiscal year 1931 in the sum of \$196,780.95, which was \$35.47 more than the amount claimed.

### ALASKA

*Trade and manufacturing.*—The sale of lands in Alaska for trade, manufacturing, or other productive industry is authorized under section 10 of the act of May 14, 1898 (30 Stat. 413). Forty cases of this character were examined and five patents issued.

*Five-acre tracts, Alaska.*—Purchase of 5-acre tracts in Alaska may be made under the act of March 3, 1927 (44 Stat. 1364). Action was taken on eight cases in which additional requirements are necessary.

*Exportation of timber.*—Under the act of April 12, 1926 (44 Stat. 242), providing for the exportation of timber from Alaska, two applications were considered. In one case the time for compliance with the terms of the contract was extended, while in the other a report of the timber cruise was received.

*Abandoned military reservations.*—Permission was granted to the Alaska Road Commission to conduct a sale of certain buildings located on the former Fort Egbert Military Reservation, Alaska. The buildings have been appraised at a value of \$645, and the sale was held on June 15, 1932.

Regulations issued March 22, 1932, governing the sale of lands within the abandoned Point Campbell Military Reservation at Point Campbell, near Anchorage, Alaska. The sale is to be held on September 15, 1932, and the tracts involved have been appraised at the rate of \$1.25 per acre plus \$1 per M feet for the timber situated on such tracts. Under date of December 5, 1931, the Government lands in 5 military reservations and 21 Signal Corps stations in Alaska were restored to the public domain. Certain tracts, on May 28, 1932, within the Fort Gibbon Military Reservation in Alaska were restored to the public domain, and regulations were prescribed governing the disposition of such restored lands.

*Fur-farming, stock-raising, and aviation landing-field* leases and town-site matters are discussed under Leases and Town sites, etc., respectively.

## TOWN SITES, PARKS, AND CEMETERIES

*Macon and Wheaton, Mont.*—Town-site reservations for the towns of Macon and Wheaton, Mont., were revoked during the year, after it was found that the lands involved were not needed for such purposes. The withdrawal orders for town-site uses of four 160-acre tracts in different localities in Montana which had not been subdivided as town sites were also revoked.

*Harding, Fla.*—In view of the fact that legislation was pending for the relief of purchasers of lots in Harding, Fla., an extension of time was granted to 98 of such purchasers who were in arrears for the purchase price of their lots.

*Superior, Ariz.*—A patent was granted for the West Side addition to Superior, Ariz., on the application of the judge of the superior court.

*Solano, N. Mex.*—The unsold lots in Solano, N. Mex., were appraised and offered for sale and several of such lots were sold.

*Wadsworth, Nev.*—A survey for a number of lots in Wadsworth, Nev., was approved, and action was taken to allow settlers on such lots to acquire title to their holdings.

*Hoonah and Wrangell, Alaska.*—Surveys were approved for two Indian villages at Hoonah and Wrangell, Alaska. Thirteen town-site matters were adjudicated, 813 town-lot cases were considered, and 253 patents were issued.

*Parks and cemeteries.*—The purchase of limited amounts of public land, for the purpose of creating parks and cemeteries for towns, was authorized by the acts of September 30, 1890 (26 Stat. 502), and March 1, 1907 (34 Stat. 1052). Patents for parks or cemeteries were granted to the towns of Hatch, N. Mex.; Wickenburg, Ariz.; Fruita, Colo.; and Skagway, Alaska. The act of February 6, 1932 (Public, No. 13, 72d Cong.), authorized the issuance of a patent for a small tract of land in Caddo County, Okla., for burial place for white residents. Further action under this act awaits the filing of an application for patent by the cemetery association mentioned in the act.

## NEW LAWS

Memoranda, or proposed reports, were prepared and submitted for your consideration on a total of 273 bills pending before the committees of Congress during the first session of the Seventy-second Congress. Thirty-seven reports were submitted on enrolled bills. Fifty-five new public or private acts, affecting the activities of this office, became laws through the approval of the President. Instructions or regulations (and status notations) affecting 51 of such acts were promulgated.

## TRACT-BOOK NOTATIONS, PRELIMINARY EXAMINATIONS, CANCELLATIONS, AND RELINQUISHMENTS

*Tract-book notations.*—The number was 160,680. This includes 72,104 appeals and other miscellaneous cases, 2,396 Indian allotments, 4,969 final and cash certificates, 2,411 oil and gas applications, 302 coal applications, 12,275 original entries, and 589 plats posted.

*Posting and preliminary examination.*—Original entries posted, 12,275; examined, 13,069; 9,911 were passed; 3,158 were suspended

for defects, or held for further action on account of conflicts. The number 13,069 includes 7,503 stock-raising homesteads.

*Applications for permits and leases, act February 25, 1920.*—Oil and gas applications, 2,411; coal applications, 302.

*Withdrawals and classifications.*—Withdrawals, etc., in 1,174 letters and Executive orders were noted. These include withdrawals for stock driveways, national forests, power-site reserves and classifications, restored lists, designations under the various homestead acts, classifications, etc.

*Cancellations and relinquishments.*—Entries canceled for failure to make final proof within the statutory period numbered 1,255 and 2,780 were relinquished and noted.

*Status cases.*—Status was furnished in 28,882 cases for adjudicating clerks.

### EXCHANGES

Various acts permit the exchange of Government land or timber for private holdings. Some of these exchanges are based on equality of area, others on equality of value. As a rule the purpose of the exchanges is to eliminate private ownership in areas intermingled with lands owned by the Government and being administered in the public interests.

*Forest lieu selections.*—The act of June 4, 1897 (30 Stat. 36), repealed with exceptions by the act of March 3, 1905 (33 Stat. 1264), provided for the exchange of a tract of land covered by an unperfected bona fide claim or by a patent in a national forest for public land outside a national forest. The consideration of 99 cases under this act resulted in the issuance of 12 patents.

*Forest consolidations.*—The consolidation of national forests by exchanging Government land or timber within the national forests for privately owned lands therein is authorized by the act of March 20, 1922 (42 Stat. 465). Exchanges under this act were considered in 604 cases, and 37 patents were issued. As a result of these exchanges, 187,179.05 acres were added to the national forests.

*Lincoln National Forest, N. Mex.*—The act of February 7, 1929 (45 Stat. 1154), provided for the exchange of privately owned lands within the Lincoln National Forest in New Mexico for lands of the public domain in the same State. Two cases under this act were before the office. One exchange is now under consideration, while the other awaits additional evidence to be supplied by the applicant. Certain privately owned lands within the Lincoln National Forest in New Mexico may be, under the act of February 14, 1923, exchanged for public lands within several counties in the same State. Five applications under this act were received, and the consummation of these exchanges awaits additional evidence to be furnished by the proponents.

*Park and monument exchanges.*—Elimination of private land-owners within the Petrified Forest National Monument in Arizona by exchanging such land for Government land outside the said monument was provided for by the act of May 14, 1930 (46 Stat. 278). One exchange under this act was perfected, resulting in the elimination of private ownership in the said monument to 12,792.80 acres. Approximately 5,500 acres in this monument remain in private ownership, and this acreage is embraced in two applications to exchange

which have recently been filed and which are now under consideration. Protecting the deer in Yosemite National Park, through exchange of land, was the purpose of the act of May 28, 1928 (45 Stat. 787). The only application under this act pending before this office was finally rejected and the case closed. One application was filed under the act of April 7, 1930 (46 Stat. 142), providing for the disposal of the lands within the former Papago Saguaro National Monument in Arizona, and action thereon awaits the acceptance of a survey of the land involved. The act of February 21, 1931 (46 Stat. 1206), authorized the exchange of certain private land holdings within the Craters of the Moon National Monument in Idaho for an equal value of reserved Government land in the same State. One case involving all of the private holdings in the said monument was considered, and further action thereon awaits a report from the field division.

*Indian lands.*—The exchange of Indian lands is treated with other Indian matters in the chapter Indians and Indian Lands.

*Bear River Migratory Bird Refuge.*—The act of February 15, 1929 (45 Stat. 1186), provided for the exchange of privately owned lands near Salt Lake City, in Utah, for certain Government lands in the same State for the purpose of establishing Bear River Migratory Bird Refuge. Although three cases were involved originally, only two applications were filed during the year, and action on one awaits completion of a survey of the privately owned lands, while the other awaits a report from the field division on the appraisal of the public lands involved.

### TRESPASS

*Timber, coal, gravel, and turpentine.*—Trespass on the public domain was considered in 1,496 cases. The Government received and accepted as damages \$82,999.47. This sum includes moneys in settlement for coal, timber, gravel, and turpentine trespasses.

*Unlawful inclosures.*—The erection or maintenance of unlawful inclosures of public land by persons having no claim or color of title thereto is forbidden and prohibited by the act of February 25, 1885 (23 Stat. 321). Under this act 84 cases were before the office, many unlawful inclosures were abated, and the cases closed.

### ABANDONED MILITARY RESERVATIONS

Determination by the President that abandoned military reservations are useless and certification by him of such areas to the Secretary of the Interior for survey, appraisal, and sale are authorized by the act of July 5, 1884 (23 Stat. 104). The act of August 23, 1894 (28 Stat. 491), and amendatory acts provided for the opening to homestead entry of abandoned military reservations where the area exceeded 5,000 acres. Cases under the above acts, numbering 125, received action, and the sum of \$7,114.06 was realized from sales of abandoned military reservation properties. Patents issued for 11 homesteads and 6 sales.

*Conveyance to Minnesota.*—The act of May 2, 1932 (Public, No. 112, 72d Cong.), authorized and directed the conveyance to the State of Minnesota for military purposes of public land which was formerly a part of the Fort Ripley Military Reservation, and steps were taken looking to the issuance of patent.

*Alaska.*—Transactions concerning abandoned military reservations in Alaska are set out under the head Alaska.

### COLOR OF TITLE

*General.*—The patenting of public lands which have been held under color of title for more than 20 years, where valuable improvements and cultivation have been made, was provided for under the act of December 22, 1928 (45 Stat. 1069). The lands are paid for at a price fixed by appraisal under the direction of the Secretary, and all minerals are reserved to the Government. This type of case was considered in 348 instances, and the sum of \$1,847.55 was realized from 17 patents involving 511.72 acres. A contest between a color-of-title applicant and a soldiers' additional homestead claimant was decided in favor of the former.

*Michigan.*—The act of February 16, 1929 (45 Stat. 1188), permits the issuance of patent upon the payment of \$1.25 per acre for public lands in Michigan where such lands have been held in good faith and in peaceful adverse possession for more than 20 years, and where valuable improvements have been erected on such lands or some part thereof has been reduced to cultivation. Seventeen such cases were considered and eight patents were issued, from which \$384.71 was received.

*New Mexico.*—The patenting of public land in New Mexico, not known to be mineral, where such lands have been claimed in good faith for more than 20 years, and valuable improvements have been erected thereon or some of the land has been reduced to cultivation, was authorized under the act of June 8, 1926 (44 Stat. 709). This class of case was considered in 51 instances and 31 patents issued. The majority of these claims were for small fractions of an acre of land, and the sum total received for the tracts so patented was \$7.05. The foregoing act was merged into the general act of December 22, 1928. On April 8, 1932, regulations were issued under the act of February 23, 1932 (Public, No. 39, 72d Cong.), which provided for the patenting of public land in New Mexico, contiguous to Spanish or Mexican grants, where such lands have been held under claim or color of title.

*Louisiana.*—Title of certain persons from the State of Louisiana to lands on Navy Commissioners Island in Louisiana was confirmed by the act of February 14, 1931 (46 Stat. 1101). Two cases under this act were received and patented, and the sum of \$354.75 was secured therefrom.

*Pensacola, Fla.*—The act of January 12, 1925 (43 Stat. 738), provides for the confirmation of title of persons claiming lots in Pensacola, Fla., through a chain of title, legal or equitable, for a period of 20 years preceding the said act. There were two cases considered under this act and one patent issued.

### ERRONEOUSLY MEANDERED AREAS

*Wisconsin.*—The sale of lands in Wisconsin, which were originally erroneously meandered, to adjacent land owners and persons who purchased such lands prior to the act and cultivated or improved the same was authorized by the act of February 27, 1925 (43 Stat. 1013). A substantial area of erroneously meandered land on the shore of Lake Namakagon, Wis., was developed in the past year and 26 applications under the said act were filed. Claims under the said act

were considered in 158 instances and 6 patents were granted, while action on the remaining claims awaits further evidence to be supplied by the applicants or reports from the field division on appraisals of the lands involved. The sum of \$1,442.88 was realized from the sale of 255.54 acres of erroneously meandered land in Wisconsin.

*Louisiana.*—The act of February 19, 1925 (43 Stat. 951), provided for the sale of erroneously meandered land in Louisiana in a similar manner to that governing the same class of lands in Wisconsin. One case was considered under this act, resulting in a patent for 67.10 acres upon the payment of the sum of \$604.44.

### REPAYMENTS

The laws governing repayments, the act of June 16, 1880 (21 Stat. 287), and the act of March 26, 1908 (35 Stat. 48), as amended by the act of December 11, 1919 (41 Stat. 366), provide for the return of moneys received in connection with the disposal of public lands and covered into the United States Treasury. Repayment may be made to the land applicant, his heirs or assigns, where lands have been erroneously sold; where payments have been made in excess of lawful requirement; and where applications, entries, and proofs have been rejected, in the absence of fraud or attempted fraud.

Under said laws there were stated 147 accounts, allowing repayment of \$9,613.99, and 204 claims for repayment were denied. The number of claims allowed includes 12 accounts granting repayment of \$1,177.97 received in connection with sales of Indian reservation lands and repaid from Indian trust funds.

*Repayment claims allowed and denied*

Year	Claims allowed	Amount	Claims denied	Year	Claims allowed	Amount	Claims denied
1923-----	1,904	\$201,914.17	856	1928-----	254	\$52,666.38	124
1924-----	1,764	99,896.42	1,105	1929-----	210	20,101.27	158
1925-----	1,168	110,915.41	310	1930-----	228	16,568.60	122
1926-----	664	34,996.77	123	1931-----	130	15,031.87	137
1927-----	715	45,883.70	138	1932-----	147	9,613.99	204

### MISCELLANEOUS

*Increased activities.*—The act approved April 23, 1932 (Public, No. 104, 72d Cong.), authorizes the Secretary of the Interior, in his discretion, to open to location, entry, and patent under the mining laws, with reservation of ways, rights, and easements, public lands of the United States which are known or believed to contain valuable deposits of minerals and which are withdrawn from development and acquisition because they are included within the limits of withdrawals made pursuant to section 3 of the reclamation act. Regulations under the act have been issued and are set forth in Circular No. 1275, dated June 22, 1932. It is expected that this will greatly increase the number of locations made under the general mining laws. There has been an increase in the number of applications for coal, potash, sodium, and phosphate leases and permits during the current year. While the number of new applications for coal permits, leases, and licenses does not show a great increase over last year, the various

questions of relief arising under certain sections of the outstanding coal leases cause more careful adjudication of each case than is usually required in considering new applications. New questions concerning the consolidation, modification, and cancellation of outstanding coal leases require more time and consideration on the part of the adjudicator, so that the Government's interest will not be impaired. Of the many coal permits about to expire, there arises for consideration petitions for extension of time. In the past year there has been quite an increase in potash lease and permit applications, due to large companies and corporations throughout the country promoting the development of the potash industry in the United States. Applications for sodium permits and leases and phosphate leases, while not as numerous as the coal and potash, do not indicate that they are by any means on the decline.

*Private land claims.*—The present title to tracts of land to which claims had attached under the laws of former governments, prior to the cession of the Territory to the United States, is ever a source of inquiries. Persons whose ancestors were among the early settlers who received grants from former governments are continually inquiring in the hope or belief that some right or title to such land still remains in the Government of the United States, to which they may succeed or be compensated for. There was much correspondence of this nature during the year.

*California.*—The presentation of homestead applications for lands in patented private land claims in California has continued, notwithstanding the efforts of the department to inform the applicants of the futility of their action. Designing persons have prompted such attempts to file these homestead applications and have sought to reopen the issues and compel the present owners of the land to defend their titles in another forum. The promoters of such schemes declare that these patented claims are not valid Mexican grants, and they ignore the decrees of the United States courts and the patents issued thereon. Many homestead applications for lands in patented private land claims were presented to the register of the district land office at Sacramento, Calif., and such register refused to accept the applications and money tendered therewith. The applications and money were returned by ordinary mail on the same day as presented. There were decided 153 private land claims, and patents issued in 16.

*Equitable adjudication.*—Decided on principles of equity and referred to the board of equitable adjudication and confirmed were 921 cases.

*Timber sales.*—The act of March 4, 1913 (37 Stat. 1015), as amended by the act of July 3, 1926 (44 Stat. 890), provided for the sale of dead, down, or damaged timber on public lands outside the national forests. Matters of sale under these acts were considered in 49 instances, and the sum of \$957.90 was realized from such sales. The act of June 3, 1878 (20 Stat. 88), and the act of March 3, 1891 (26 Stat. 1093), as amended by several acts, provided for the free use under permit of timber on mineral and nonmineral lands; 17 applications were considered thereunder and 9 permits issued.

*Military bounty-land warrants.*—Military bounty-land warrants, of which only a few are outstanding, may only be used in lieu of cash as payments on other entries or claims. Such warrants were considered in 19 cases, and patents issued on 2 old warrant locations.

The records of these warrants contain information of a historical nature, and there was much correspondence concerning the warrantees.

*Soldiers' additional homesteads.*—Soldiers' additional homestead rights were granted in certain cases to Civil War veterans, their widows and minor children under the provisions of sections 2306 and 2307 of the United States Revised Statutes. This class of case was considered in 577 instances, and 46 patents were granted.

*Small holding claims.*—The perfection of small holding claims on the public domain was permitted under the act of March 3, 1891 (26 Stat. 854), and supplemental acts; 27 such claims were adjudicated and 14 patents granted.

*Cash and credit entries.*—Unperfected cash and credit system entries under laws which governed the disposition of the public domain in the early existence of the Government were considered in 16 cases, resulting in 9 patents.

*Scrip.*—Comparatively few cases (93) of the various kinds of scrip evidenced by certificates were presented, and of these only 3 were passed to patent.

*Quitclaims.*—Section 6 of the act of April 28, 1930 (46 Stat. 256), authorized the Commissioner of the General Land Office to issue quitclaim deeds where title to lands had been inadvertently relinquished to the United States. Four quitclaim deeds were so executed.

*Accretions, Louisiana and Mississippi.*—The act of April 11, 1928 (45 Stat. 422), provided for the sale of land accreted to Glasscock Island in the Mississippi River between the States of Louisiana and Mississippi. Two claims were finally decided under this act, litigation in the courts over the land involved ceased, conflicting claims were rejected, and two patents were issued. The sum of \$2,485.92 was realized from the sale of 526.43 acres.

*Lieu selections for canceled confirmed entries.*—The selection of other land in exchange for land embraced in entries found to have been confirmed under the provisions of section 7 of the act of March 3, 1891 (26 Stat. 1099), but which confirmed entries were canceled and the lands involved were otherwise disposed of by the Government, was authorized by the act of January 27, 1922 (45 Stat. 359). There were 12 cases considered and 3 patents issued.

### STOCK-RAISING HOMESTEADS

All minerals were reserved to the United States, with the right to prospect for, mine, and remove the same, in patents issued under the act of December 29, 1916 (39 Stat. 862), on 2,460 final stock-raising homestead entries embracing an area of 1,099,642.50 acres.

*Patents issued annually under the stock-raising homestead acts from June 30, 1919, to June 30, 1932*

Year	Number of patents	Area	Year	Number of patents	Area
		<i>Acres</i>			<i>Acres</i>
1919.....	21	4,938.00	1927.....	6,152	2,400,604.81
1920.....	1,411	376,065.71	1928.....	3,460	1,387,277.80
1921.....	4,299	1,249,592.63	1929.....	3,271	1,350,384.64
1922.....	8,399	2,919,819.67	1930.....	2,530	1,057,262.25
1923.....	7,393	2,590,758.70	1931.....	2,462	1,051,593.21
1924.....	7,767	2,932,158.49	1932.....	2,460	1,099,642.50
1925.....	6,416	2,507,122.12			
1926.....	6,490	2,513,675.87	Total.....	62,531	23,440,896.40

*RESERVED DEPOSITS*

Patents to the extent of 1,223,712.01 acres issued with a reservation of all or some specific mineral, distributed as indicated below.

	Acres
Stock-raising homestead, all mineral reserved.....	1, 099, 642. 50
Miscellaneous, all minerals reserved under other than stock-raising homestead acts.....	20, 689. 08
Coal.....	35, 944. 05
Oil, gas, phosphate, or other named mineral.....	67, 436. 38
Total.....	1, 223, 712. 01

The above reserved deposits added to those of previous years total:

	Acres
Stock-raising homestead.....	23, 440, 896. 40
All mineral under other acts.....	104, 472. 14
Coal.....	10, 727, 659. 32
Oil, gas, etc.....	1, 629, 529. 16
In all.....	35, 902, 557. 02

*REMAINING PUBLIC DOMAIN*

*Vacant public land.*—Subject to all applicable public land laws are 173,318,246 acres of vacant public lands. There are surveyed 123,984,529 acres and unsurveyed (estimated) 49,333,717 acres. The above does not include any public lands situated in the Territory of Alaska, or embraced in an Indian, military, or naval reservation, national forest or park, or withdrawn for stock driveways or other public purposes.

*National-forest lands.*—Careful estimates place the area of public lands within the exterior limits of national forests, exclusive of Alaska, that are subject to the provisions of the mining laws, to possible certification by the Secretary of Agriculture for restoration to homestead entry under the act of June 11, 1906 (34 Stat. 223), and lands or timber to exchange for privately owned lands within the forest of the same State, at 133,800,000 acres.

*Stock-driveway withdrawals.*—The mining laws, under such rules, regulations, and restrictions as may be prescribed by the Secretary of the Interior, were extended to the lands within stock-driveway withdrawals by the act of January 29, 1929 (45 Stat. 1144). There are within the exterior limits of such withdrawals 9,535,955 acres.

*Producing oil and gas fields.*—The areas in oil and gas leases and in structures classified as oil and gas producing comprise 843,106 acres. A considerable part of the producing structures is privately owned.

*Carey Act withdrawals* include 925,830 acres.

*Power-site reserves* embrace 5,005,242 acres.

*Public-water reservations* contain 437,249 acres.

*Reservoir sites* cover 254,010 acres.

*Miscellaneous reserves* involve 1,460,847 acres and include the revested Oregon & California Railroad and the reacquired Coos Bay Wagon Road grant timberlands. (Acts of June 9, 1916, 39 Stat. 218, and February 26, 1919, 40 Stat. 1179.)

Scattering tracts of lands the title to which had passed out of the Government are included in the totals under "Stock driveways," "Power site," and "Miscellaneous reserves," but it is not believed

that such areas constitute more than 10 per cent of the whole in any of the several classes.

*Reclamation withdrawals.*—The gross area withdrawn approaches 22,000,000 acres. Intermingled with public lands are many tracts, some of considerable extent, in private ownership. It is estimated that 61 per cent, or 13,400,000 acres, are owned by the Government. Primarily these lands are administered by the Bureau of Reclamation, but many of the withdrawals are temporary, and upon elimination the tracts are restored to the public domain. When water is available the lands are entered and patented under the supervision of the Commissioner of the General Land Office.

*Alaska.*—The Territory of Alaska contains 378,165,760 acres. Reservations affect about 30,000,000 acres. Of such reserved area 21,397,006 acres are within the boundaries of national forests. There have been surveyed 1,969,865 acres. No computation has been made of the appropriated lands in the Territory.

*Existing unperfected entries, selections, and filings.*—The legal title to 24,164,842 acres now embraced in unperfected entries, selections, and filings is in the Government, and cancellations, whether brought about by relinquishment or contest or other means, inure to the benefit of the Government. The United States, therefore, has an interest in all unperfected entries. The area covered by homesteads is 20,038,606 acres, approximately 83 per cent of the whole.

### RECAPITULATION

*Summary of the areas to which the activities of the General Land Office extend*

	Acres
Vacant lands subject to all applicable public land laws.....	173, 318, 246. 00
National forest land subject to all mining laws and possible homestead entry.....	133, 800, 000. 00
Stock-raising homesteads, all minerals reserved.....	23, 440, 896. 40
All minerals reserved in patents under various acts other than stock-raising homestead law.....	104, 472. 14
Coal reserved.....	10, 727, 659. 32
Oil, gas, phosphate, or other named mineral reserved.....	1, 629, 529. 16
Stock-driveway withdrawals subject to the mining laws.....	9, 535, 955. 00
Existing unperfected entries, etc.....	24, 164, 842. 00
Producing oil and gas fields.....	843, 106. 00
Carey Act withdrawals.....	925, 830. 00
Power-site reserves.....	5, 005, 242. 00
Public water reservations.....	437, 249. 00
Reservoir sites.....	254, 010. 00
Miscellaneous reserves.....	1, 460, 847. 00
Reclamation withdrawals.....	13, 400, 000. 00
<hr/>	
Total, subject to all or some applicable public land law or in which the Government has or may have an interest.....	399, 047, 884. 02
Alaska.....	378, 165, 760. 00
<hr/>	
Grand total.....	777, 213, 644. 02

The totals under "Stock driveways," "Power site," and "Miscellaneous reserves" included about 10 per cent privately owned lands. The areas not in Government ownership in producing oil and gas fields are not known. Lands in Indian, military, and naval reservations or withdrawals are not included, nor are those in national parks or monuments.

Very respectfully,

C. C. MOORE, *Commissioner.*

The Honorable the SECRETARY OF THE INTERIOR.

## APPENDIX

## STATISTICS RELATING TO THE DISPOSITION OF THE PUBLIC DOMAIN

## Area of States and Territories

[Based upon careful joint calculations made in the General Land Office, the Geological Survey, and the Bureau of the Census]

State or Territory	Land surface		Water surface		Total areas	
	<i>Sq. miles</i>	<i>Acres</i>	<i>Sq. miles</i>	<i>Acres</i>	<i>Sq. miles</i>	<i>Acres</i>

<sup>1</sup> Including adjacent islands.

Owing to their location adjoining the Great Lakes, the States enumerated below contain approximately an additional number of square miles as follows: Illinois, 1,674 square miles of Lake Michigan; Indiana, 230 square miles of Lake Michigan; Michigan, 16,653 square miles of Lake Superior, 12,922 square miles of Lake Michigan, 9,925 square miles of Lake Huron, and 460 square miles of Lakes St. Clair and Erie; Minnesota, 2,514 square miles of Lake Superior; New York, 3,140 square miles of Lakes Ontario and Erie; Ohio, 3,443 square miles of Lake Erie; Pennsylvania, 891 square miles of Lake Erie; Wisconsin, 2,378 square miles of Lake Superior and 7,500 square miles of Lake Michigan.

In addition to the water areas noted above, California claims jurisdiction over all Pacific waters lying within 3 English miles of her coast; Oregon claims jurisdiction over a similar strip of the Pacific Ocean 1 marine league in width between latitude 42° north and the mouth of the Columbia River, and Texas claims jurisdiction over a strip of Gulf waters 3 leagues in width adjacent to her coast and between the Rio Grande and the Sabine Rivers.

<sup>1</sup> In the adjustment of this grant the road was treated as an entirety and without reference to the State line; hence Alabama has had approved to her more and Mississippi less than they would appear to be entitled to in proportion to the length of the road in the respective States.

<sup>2</sup> This grant was adjusted Apr. 24, 1893, and 302,181.16 acres were allotted to the company. The balance of the previously certified lands were ordered restored to entry under the forfeiture act of Sept. 29, 1890.

<sup>3</sup> Certified lands footing 719,189.79 acres were reconveyed to the United States by the Governor of Louisiana, Feb. 24, 1888, the grant having been forfeited by the act of July 14, 1870 (16 Stat. 277).

*Lands patented or certified under concessions by act of Congress to States and corporations for railroad and military wagon-road purposes from the year 1850 to June 30, 1932—Continued*

Grand total	-----	<u>38,206,045.10</u>

<sup>4</sup> Includes 35,685.49 acres of the Chicago, Rock Island & Pacific R. R.; 109,756.85 acres of the Cedar Rapids & Missouri R. R.; and 77,535.32 acres of the Dubuque & Sioux City R. R., situated in the old Des Moines River grant of Aug. 8, 1846, which should be deducted from the foregoing amount. (Walcott v. Des Moines Co., 5 Wall. 631.)

<sup>5</sup> Excess of 131,481.71 acres originally certified under this grant reconveyed by State or entered under act of Mar. 3, 1887, by Michigan Land & Iron Co. (Ltd.), grant having been forfeited in part by act of Mar. 2, 1899 (25 Stat. 1008).

<sup>6</sup> Declared to be one grant. (See 32 L. D. 21.)

<sup>7</sup> See Minnesota for original grants.

<sup>8</sup> Includes 186,936.72 acres of the "Osage ceded reservation," which are to be deducted from the above amount under the decision of the Supreme Court in the case of the Leavenworth, Lawrence & Galveston R. R. v. The United States (92 U. S. 733).

<sup>9</sup> Includes 270,970.78 acres in the "Osage ceded reservation," which are to be deducted under the decision cited in note 8.

*Lands patented or certified under concessions by act of Congress to States and corporations for railroad and military wagon-road purposes from the year 1850 to June 30, 1932—Continued*

<sup>1</sup> Circular No. 1282, Vacant Public Lands, can be had on application to the Commissioner of the General Land Office, Washington, D. C., which shows by States, land districts, and counties the areas of vacant, unappropriated, and unreserved public lands, surveyed and unsurveyed, with a brief statement of their character.

<sup>2</sup> This total does not include areas remaining undisposed of in the States of Alabama, Kansas, Louisiana, Michigan, Mississippi, Oklahoma, and Wisconsin or the area of the vacant and unreserved surveyed public lands in Alaska, which figures are not available.

District Land Offices at Little Rock,  
Gainesville, Cass Lake, and Alliance,  
discontinued Jan. 31, 1933. See  
paragraph two of this circular.

## CIRCULAR No. 1282

## VACANT PUBLIC LANDS ON JULY 1, 1932

DEPARTMENT OF THE INTERIOR,  
GENERAL LAND OFFICE,  
*Washington, D. C., July 1, 1932.*

## GENERAL INFORMATION

The lands in the thirteen original States, Connecticut, Delaware, Georgia, Maryland, Massachusetts, North Carolina, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, South Carolina, and Virginia, also in Texas, never formed a part of the public domain; their disposition is governed by the State laws, and information concerning same should be sought from the State authorities.

There are no public lands in the State of Kentucky and Tennessee, and none is known to this office remaining undisposed of in the States of Illinois, Indiana, Iowa, Missouri, and Ohio. Small areas remain in the States of Alabama, Kansas, Louisiana, Michigan, Mississippi, Oklahoma, and Wisconsin, in widely scattered tracts, and no descriptive lists thereof are available. Entry of these lands must be made at, and all other related business transacted with, the General Land Office, at Washington, D. C., as there are no district offices in the States named.

Because of the small proportion of surveyed land, no attempt is made to give statistical information concerning the unappropriated Government land in the Territory of Alaska. The total area of the Territory is 378,165,760 acres, of which about 30,000,000 acres are reserved. Of the reserved area, 21,397,239 acres are within the boundaries of national forest. Approximately 1,969,865 acres have been surveyed under the rectangular system and special surveys by metes and bounds.

The following tables show, by States, land districts, and counties, the area of unappropriated and unreserved public lands, surveyed and unsurveyed, with a brief statement of their character.

These figures are as nearly correct as is possible under the circumstances and are mainly intended to convey general information as to the quantity, character, and location of the public lands. As a rule, the Government is unable to furnish specific information as to soil, topography, and value of the land for different purposes. It may be stated generally, however, that the remaining vacant public

lands, not mineral in character, are chiefly valuable for grazing purposes, though some tillable land may be found.

The General Land Office can not advise inquirers as to the location of the unappropriated tracts in counties where only a few acres are reported as vacant. Information on that subject may be obtained by a careful examination of the records of the district land offices or of this office, which are open for inspection when not in official use. No maps of States and counties showing the location of the vacant public lands are furnished but township diagrams and plats giving information specified below may be prepared and sold by the registers of the various district land offices at the following prices:

For a township diagram showing entered land only.....	\$1. 00
For a township plat showing form of entries, names of claimants, and character of entries.....	2. 00
For a township plat showing form of entries, names of claimants, character of entry, and number.....	3. 00
For a township plat showing form of entries, names of claimants, character of entry, number, and date of filing or entry, together with topography, etc.....	4. 00

The General Land Office records are subject to reasonable inspection for the purpose of obtaining data as to vacant public land, and it will be glad to furnish information as to the status of any particular tract if the legal subdivision, section, township, and range thereof, according to the public land survey, is given, or, if unsurveyed, by its relative position to adjacent surveyed lands.

The district officers furnish prospective settlers general advice as to lands in their respective districts and literature regarding the methods of making entry. However, personal inspection must be made of the tract to be entered before application is filed, and the settler should exercise great care to satisfy himself as to its character before taking any other step.

No stamps or self-addressed envelopes need be sent with inquiries.

Very respectfully,

C. C. MOORE, *Commissioner.*

Approved: July 25, 1932.

Jos. M. DIXON,

*First Assistant Secretary.*

# VACANT PUBLIC LANDS ON JULY 1, 1932

3

Statement showing the unappropriated and unreserved lands by district and county on July 1, 1932

[Counties containing no vacant land are omitted]

## ARIZONA
